Letter from the Chair

Dear Shareholders,

It is a privilege to address you as Chair of Bankinter to present the Annual Report, which marks the conclusion of the 2024 financial year. This year has been especially significant, as I had the privilege of passing on the role of Chief Executive Officer to my successor, Gloria Ortiz, through a succession process that was thoroughly planned and executed with great care.

For the first time, the new CEO is presenting her report to you. The interview included in this Annual Report and the financial results presented portray the bank's exceptional performance, surpassing the figures from previous years and setting a new record in terms of revenue and profits.

Sadly, 2024 was also marked by the passing of Jaime Botín Sanz de Sautuola, a key figure in Bankinter's history. He was Chairman of the bank between 1986 and 2002, and a reference shareholder since the bank's inception 60 years ago. This has been a great loss for the Bankinter family. We have lost a person with an in-depth understanding of the banking business, of its risks and its opportunities, and an exceptional person, full of virtues, sensitivity, and curiosity, whose loss we will mourn for many years.

In the macroeconomic sphere, 2024 witnessed robust indicators in the Spanish economy, with a GDP growth of 3.2%, surpassing the previous year's figure by half a percentage point. Falling energy prices, booming exports and strong performance of the tourism sector have helped maintain a resilient labour market. However, there is still a need to address the discrepancies between these figures and the daily reality of many families, who continue to face difficulties in essential areas, such as housing, employment and earnings.

The year was also marked by the devastating catastrophe that affected several municipalities in the surrounding areas of the Turia River (Valencia). The outrage over the tragedy was compounded by the lack of adequate responses from those who should have investigated and corrected its causes instead of concentrating on pinpointing responsibility. This situation underpins the importance of responsibility in crisis management.

For Bankinter, 2024 has been a year of growth and continuous support from customers, whether companies or families, during which we have helped finance their projects and manage their savings effectively. From a financial standpoint, the bank achieved its best-ever result, with 953 million euros, an increase of 13% compared to the previous year. All the business lines and markets in which we operate have seen growth, strengthening the diversification of our activity and increase of our market share.

Our key financial indicators reflect the strength of our performance and our leading position in the European financial sector. In addition, our share price increased by 32%, exceeding the average of listed banks in Spain.

These achievements, together with our capacity to generate organic capital, have led the Board of Directors to announce a dividend payout of 476 million euros, equivalent to 50% of annual attributable profit.

María Dolores Dancausa. Chair of Bankinter

As for 2025, the future is marked by many factors beyond our control, but also by many others that we can control. Our 60-year history and, in particular, the last decade, are a strong indicator of our likelihood of success. While past achievements do not ensure future success, they serve as the groundwork for our ongoing progress. Our success is not the result of chance, but of thousands of good decisions made by a team of more than 6,000 professionals who have put their talent at the service of Bankinter.

In this scenario, the levels of efficiency achieved in our digital channels and the solid relationship with our customers place us in a strong position to achieve even better results. However, external factors such as political instability in Western Europe, volatility in financial markets and armed conflict in Ukraine and the Middle East continue to create uncertainty.

I would like to highlight two areas that are becoming increasingly important and where Bankinter is firmly positioned: Sustainability and Innovation and, in this field, also our Bankinter Innovation Foundation.

With regard to our commitment to Sustainability, such a commitment has been consolidated over the years through the integration of ESG (Environmental, Social and Governance) criteria into our value chain. We avoid passing trends and focus on actions with a positive impact on society. This year, we rolled out the 2024-26 DNA Strategic Plan, based on three pillars: D stands for differentiation, which highlights this characteristic of our identity in our relationship with customers, Bankinter's people or innovation; N stands for sustainable business, where Bankinter has made significant progress on matters related to marketing of sustainable funds or financing renewable energy operations; and A stands for responsible action, which focuses on ethical management of the bank.

In terms of innovation, Bankinter is still a sector benchmark in terms of the use of cutting-edge technologies and data, with a view of offering the best possible service to its customers. We continue to strengthen our digital channels, which are currently the main way of interacting with the bank. In addition, we have optimised the use of Artificial Intelligence to increase productivity in the Central Services area and the Sales Network, which is improving the customer experience and boosting the efficiency of our processes.

Since its inception, the Bankinter Innovation Foundation has promoted innovation and entrepreneurship. This year, we have added a new programme, "InspiraTech", designed for PhD students and which aims to transform scientific research into real solutions for the market, joining our other programmes: "Future Trends Forum", "Akademia", "Start Ups" and "Cre100do".

In short, after a record year, we face 2025 with optimism and confidence in the future of Bankinter. We remain aligned with the principles that have brought us here, convinced that perseverance in what works is the best guarantee of success. We hope to continue growing and that you will continue to benefit from the increasing value of your investment in Bankinter.

Earnings are growing at a steady pace despite falling interest rates

What do you think about the performance of the economy in 2024?

The Spanish economy demonstrated significant strength, exceeding the expectations and outperforming other developed countries, both in terms of growth and employment, largely due to the activity in the tourism sector, household consumption and the export sector. The Portuguese and Irish economies, in which Bankinter has an increasingly important stake, also performed positively, in contrast to the concerning weakness of the French and German economies.

Some threats are still on everyone's mind and, in some cases, they represent harsh realities. For example, the war between Russia and Ukraine or the highly tense situation in the Middle East. Trump's arrival at the White House also poses much uncertainty. And then there is, of course, the downward correction of interest rates, which directly affects economic and financial activity.

How did the downward correction of interest rates affect the banking sector?

In 2024, the fall in interest rates somewhat compressed banking profits due to its negative impact on net interest margin. However, this effect was offset by the significant increase in fees and, in the case of Spain, by the positive consequences of the economic boom, which allows a greater volume of investment to be secured, maintaining the historically low default rates. These positive dynamics influenced the sector's stock price, which grew by more than 20%.

In this macroeconomic and sector context, how was Bankinter's performance?

I think we can say that the results of the year were very good, as they increased at a sustained pace and reflect the bank's ability to continue growing organically in a context of lower interest rates. Customer credit increased by 4.18%, reaching 80 billion euros.

Gloria Ortiz. Chief Executive Officer of Bankinter

Of particular note was the growth rate of off-balance sheet assets, which totalled 58 billion as of 31 December, i.e. a 22% increase. Net income amounted to 953 million euros, representing an improvement of 12.8% compared to 2023 and a return on equity of 17.9%, compared to 17.1% in the previous year.

Thanks to the intense commercial activity, all operating statement lines in the income statement improved, including the interest margin, which closed at 2.3 billion euros, 2.9% above the previous year, despite the drop in interest rates, as mentioned above. The bank's fees rose by 15% to 717 million euros, driven by the asset management business, payment and collection transactions, and the brokerage business. The customer wealth of the Commercial Retail Banking area increased by 12%, with an additional contribution of 14 billion euros. The Corporate & SME Banking area's loan book increased by 6%, up to 34.7 billion. Moreover, a new step forward was taken within the territorial diversification process, so all income generated by the subsidiaries in Portugal and Ireland now represent 15% of the Group's gross operating income.

These results are a new record for the bank, which has been achieved despite the fact that for another year we had to face the bank levy, which we consider unfair and discriminatory. The tax, which is being appealed and is an anomaly on the European tax map, meant deducting 95 million euros from profits. Nevertheless, I think we can legitimately say that for yet another year we have exceeded the most optimistic expectations.

A bank's profits are important, but so is its financial soundness...

This is a fact. This is why we are committed to making Bankinter not just a dynamic, diversified and profitable bank. Moreover, Bankinter is still seen as a benchmark in terms of asset quality, with a non-performing loan ratio of 2.11%, one of the lowest in the sector and a cost-to-income ratio of 36.3%, the best in the Spanish banking sector. Also noteworthy is the bank's comfortable position in terms of solvency, which is reflected in a CET1 capital ratio of 12.41%, i.e. 440 basis points higher than the minimum required by the European Central Bank for Bankinter for 2025: 8.01%, the lowest among listed Spanish banks.

Thanks to this strong performance in all areas, we can once again fulfil our commitment to distribute a dividend equivalent to 50% of our profit.

One of Bankinter's main developments in 2024, which will be implemented during 2025, was the decision to merge with EVO Banco, which until now had been operating as an independent subsidiary. What is the reason for this operation?

When we merged with EVO in 2019, we thought it made sense to have a stand-alone, digital-only business with a simple value proposition and the capacity for growth and profitability. Five years later, with EVO already profitable and growing at double digits, we have demonstrated that this project was viable. However, we now believe that it is the right time to start a second phase. For several reasons. We aim to equate the return on equity of EVO with that of all other businesses of the bank. We also seek to make EVO's innovations in the digital realm transcend all our customers, something that has not been happening until now. We believe that the operation will allow us to meet both objectives more quickly, since we combine investment strength and economies of scale with digital talent, all of which will allow us to attract more customers.

"

The profits reflect the bank's capacity to continue growing at an organic scale in a context of narrowing net interest margin

"

With the integration of EVO Banco we combine investment strength and economies of scale with digital talent to reach a greater number of customers

"

This year, as we celebrate our 60th anniversary, we will be in a position to improve on the record profit of 2024

What other milestones characterised the past year?

The merger with EVO was not the only strategic decision adopted in 2024. The creation of a new Digital Organisation (which will incorporate EVO's customers) was also agreed, which will be a key tool for customer acquisition in the future. With regard to our products, we achieved some significant successes. The growth of the investment fund business was very positive and the Bankinter Premium Fixed Income fund became the third largest in Spain in terms of inflows. During its first year, 15,774 customers opened the Digital Account, with a balance of 1.7 billion euros. Likewise, the volume of the Dual Mortgage totalled 250 million. Moreover, two areas celebrated very important and highly successful anniversaries. Partner Banking, which already has over 50,000 active customers, thanks to the agreements signed with large corporations, celebrated its thirtieth anniversary, as did Bankinter Investment, a pioneer in alternative investment, with a committed capital exceeding 5 billion euros.

What are the bank's expectations for 2025?

I am very optimistic. The drop in interest rates will force us to manage margins well, because there will be a narrowing of the net interest margin, but I believe that we will be able to compensate for this with higher volumes and higher earnings from fees and intermediation. We are also confident that the commitment and enthusiasm of our professionals will help us face the upcoming challenges. To sum up, I believe that in 2025 we are in a position to improve on the record profits of 2024, to maintain the high level of return on equity and to maintain the growth rate of all our businesses. Moreover, I hope that geopolitical risks, which are a source of great uncertainty, remain contained. Having said all that, I have no doubt that in 2025 Bankinter will continue to be a strong leader in the Spanish market in many aspects, such as asset quality, solvency, profitability and efficiency. In addition, in 2025 we celebrate the bank's sixtieth anniversary, the perfect reason to feel proud of what we have achieved in the past and to be excited about our future achievements.

Strategy

Business growth and diversification

Bankinter has once again closed a successful year thanks to the rapid adaptation of its strategy.

The Spanish economy advanced steadily during 2024, with very positive growth figures compared to the rest of the developed countries, exceeding expectations and demonstrating strong resilience thanks to the good performance of activities such as tourism, household consumption and the export sector.

At the same time, other economies in our surroundings, such as Portugal and Ireland, where, together with Spain, Bankinter concentrates its business activity, have had an equally positive performance, demonstrating greater dynamism than other traditionally more buoyant countries, in contrast to the concerning weakness of the France or, in particular, Germany.

The economy and international geopolitics have been influenced by a series of variables: variables persisting from previous years, such as the armed conflict between Ukraine and Russia or those in the Middle East; some of which broke out recently, such as the uncertainty surrounding the arrival of the Trump Administration; and others that affect economic and financial activity more directly, such as the downward correction of interest rates agreed by the central banks to stimulate the economy now that inflation has stabilised.

In this sense, Bankinter's business activity has been, on the one hand, boosted by the favourable winds of the regions in which the bank operates and, on the other, weighed down by the trends in interest rates, which complicates the generation of income via the net interest margin.

With all this, Bankinter has achieved another successful year thanks to the quick adaptation of its strategy to this new context. The bank has thus intensified its commercial activity in strategic segments, with strong growth in business volumes and in the number of customers, with a special focus on products and services that provide the greatest value for the customer and, consequently, also for the bank via fees. Likewise, it has enhanced the diversification of its sources of income, which are gaining importance in the Group's accounts.

This diversification has led to incremental business from geographies other than Spain where the bank operates (Portugal, Ireland and Luxembourg) now accounting for more than 18% of the Group's revenues. To boost this growth, Bankinter has made significant investments in the technological platform of its Portuguese subsidiary. In addition, at the end of November, the bank received authorisation from the relevant authorities to create the Irish branch, which will begin operating in 2025 under the name Bankinter Ireland; both of these items will undoubtedly serve to drive this growth.

Increasing market share in the Corporate & SME Banking and Commercial Retail Banking areas

In the corporate business, Bankinter has made use of its specialisation to continue gaining market share. The export strength acquired by the Spanish economy has boosted the International Corporate & SME Banking business, which hit record figures this year. Bankinter has also significantly boosted its support and advisory service for companies requesting funds from the *Next Generation programme*. Likewise, the Bank has strengthened its investment banking line, specialising in the *middle market*, to help companies and entrepreneurs with their key projects: Mergers and Acquisitions, Real Estate Investment, Capital Markets or Structured Financing.

In the Commercial Retail Banking business, the Wealth Management and Retail Banking segments have experienced significant growth, exceeding 127 billion euros in customer wealth together. The first of these reached a record figure to 71 billion euros, thanks to a global portfolio that meets our customers' needs: financial, tax, real estate, *family office*, etc.

The positive performance of the investment fund business has played a quite important role in this growth, placing Bankinter Asset Management among the asset managers with the highest net inflows on the market.

On the asset side, Bankinter's mortgage offering, which features innovative solutions such as the Dual Mortgage, has benefited from the positive performance of the economy and the drop in interest rates, experiencing a change in trend in new production, which is already higher than last year and which has driven the growth of the Group's total mortgage portfolio, by 5% in the year.

As for EVO Banco, which is making a profit this year after reaching break-even in 2023, it has already been authorised by the Ministry of Economy to become part of the Group's structure. The entire business and customers of the subsidiary will become part of the bank's recently created Digital Organisation, along with the rest of the bank's digital customers. An organisation that will be one of the bank's main strategic commitments and will be a spearhead in customer acquisition.

Results

Commercial activity and diversification boost Group profits

In 2024, the Bankinter Group achieved a pre-tax profit of 1.36 billion euros, 10.7% more than in 2023, while net profit stood at 953 million euros (+12.8%). The improvement in results was made possible by the strong momentum in commercial activity, which was increasingly diversified by activities and geographies. This strategy is leading, year after year, to a growth in business volumes with customers, which at the end of 31 December 2024 amounted to 223 billion euros (+9%), including customer credit, customer deposits and customer wealth.

Net profit reached a record figure

1.36
billion euros
(+10.7%)

Ratios

The various ratios in the account demonstrate the strength of the bank's balance sheet and its results.

Return. Return on equity (RoE) rose from 17.1% to 17.9% and ROTE stood at 19% at the end of the year, 84 basis points higher than in 2023.

Capital. The highest quality capital (fully loaded CET1) increased to 12.41%, 440 basis points above the minimum required for Bankinter by the European Central Bank for 2025 (8.01%, the lowest among listed banks).

Non-performing loans. The non-performing loan ratio remained at 2.11%, with coverage rising to 68.8% for prudential reasons. In Spain, specifically, it was 2.4%, compared to a sector average of 3.4%, according to November data from Banco de España.

Loan-to-deposit ratio. The loan-to-deposit ratio stood at an optimal 94.7% at the end of the reporting period.

Balance sheet

Total assets. Total assets stood at 122 billion euros, 7.9% more than a year ago.

Credit. Its volume reached 80.1 billion euros (+4.2%).

Customer funds. They grew by 13.1% in total. Retail deposits amounted to 83 billion euros (+1.8%) and assets managed off-balance sheet (own and third-party investment funds distributed by the Bank, pension funds, asset management, SICAVs and alternative investments) closed one of their best years, with 57.7 billion euros, 10.5 billion euros more than in 2023 (+22.2%).

Income statement figures

All operating statement lines in 2024 performed better than in the previous year, demonstrating that the bank managed spreads effectively in an environment of changing interest rates, while boosting its commercial activity across all of its geographies to generate higher revenues.

Net interest margin. The net interest margin was 2.3 billion euros (+2.9%) at the end of 2024, effectively withstanding the impact of declining interest rates.

Gross operating income. It rose to 2.9 billion euros (+9.1%), with total income from fees of 917 million euros (+12.3%). Also worth highlighting is the good performance of fees from the asset management businesses (+21%), payment and collection transactions (+7%) and securities services (+12%). Subtracting the fees paid by the bank to its commercial partners in the Agent Network and Partner Banking, the net fees received by the bank stood at 717 million, 14.9% more than in 2023.

Profit lines. It grew by 10.8% to 1.848 billion euros, covering operating costs that increased by 6% due to greater investments in new projects and digital systems designed to boost and improve the levels of productivity.

Cost-to-income ratio. Revenue growth made it possible to increase the Group's cost-to-income ratio.The ratio improved by one percentage point to 36.3%, maintaining its leading position in the sector.

Regions

The revenues generated by Bankinter Portugal and Ireland now account for 15% of the Group's total gross operating income.

Spain. Handles the bulk of the activity, including EVO. Pre-tax profit in Spain was 1.2 billion euros (+10%). The loan book stood at 66 billion euros (+2.4%). Customer funds (retail and wholesale, ex repos) totalled 76 billion euros (+4%) and those managed off-balance sheet plus intermediation reached 122 billion euros (+20%).

Portugal. The customer credits portfolio closed the year at 10 billion euros (+8%). The total amount of customer funds increased by 14%. Off-balance-sheet managed funds plus assets under custody increased by 10% to 9 billion euros. Bankinter Portugal's pre-tax profit in 2024 was 195 million euros (+18%).

Ireland. Customer credits rose by 27% year-on-year to 3.8 billion euros, including a mortgage portfolio of 2.9 billion (+31%) and 1 billion euros in consumer finance (+17%). New customer credits totalled 1.2 billion euros, 17% more than in 2023. The subsidiary's pre-tax profit amounted to 41 million euros (+23%).

Commercial Retail Banking

The retail banking business made its largest contribution to the Group's revenues. Customer wealth managed stood at 127 billion euros, 14 billion more than at the end of 2023 (+12%). Of the latter, 7 billion euros correspond to net new money and the other 7 billion euros to the market effect.

Breaking down customer wealth managed by segment, 71 billion euros come from Private Banking, which serves high-net-worth customers, and 57 billion euros from Retail Banking.

Asset management. This is a core activity for fee generation, which spearheaded the bank's growth, with off-balance sheet managed funds that at the end of December totalling 58 billion euros, 22.2% more than in 2023. Investment funds, both proprietary and third-party funds distributed by the bank, had a historic year, placing Bankinter Asset Management among the top three fund managers in the Spanish market with the highest net inflows, according to Inverco. The bank's own investment fund portfolio closed at 16 billion euros (+24.1%) and that of funds from other management companies distributed by the bank at 24 billion euros (+23.2%). Pension funds experienced an increase of 11.2% and the asset management and SICAV portfolio increased by 30%.

Salary accounts. It is one of the products with the greatest power to attract customers and a way for many customers to join the bank. The number of accounts in 2024 increased by 4%, totalling 665,000.

Mortgages. They experienced a certain boost in the second half of the year, in line with the better performance of the home sales market, which allowed new mortgage production to equal that of the previous year: 5.8 billion euros, of which nearly 70% were fixed or mixed rate. Bankinter's market share in these operations was 6.6% in Spain, 6% in Portugal and 7.1% in Ireland, according to the latest data published by the relevant central banks. The Bankinter Group's residential mortgage portfolio amounted to 36.5 billion euros as of December 31st, 5% more than on the same date in 2023.

Bankinter Investment. Bankinter continued to lead the alternative investment business, with 28 structured vehicles, in which more than 14,700 investors have invested, with a committed capital at the end of 2024 of 5 billion (+11.2%).

Corporate & SME Banking

Its loan book closed 2024 at 34.7 billion euros (+6%). Bankinter has continued to expand its credit portfolio in recent years, actively financing companies in their development projects.

By country, investment growth in Spain was 7%, as opposed to a flat performance in the sector; and 9% in Portugal, with the sector growing at 3%, always according to the latest data published in November by the Banco de España and the Bank of Portugal, respectively.

The investment balance in the International Banking business as of 31 December was 10.2 billion euros, with annual growth of 14%. This demonstrates the bank's momentum in this financing activity and its support for companies in their international projects.

The Bankinter share

The stock price rose by 32%

The Bankinter share performed very well in 2024, recovering from an atypical year (2023). Shareholders who held their shares throughout the entire year achieved a total return of +39%, including the ordinary dividends distributed for 2024, which grew by 12% compared to the previous year. The share price has risen by +31.8% over the last twelve months, while the average of Spanish listed banks stood at 23.5% (banks listed in IBEX35). The IBEX 35 rose by 13.9% and the Eurostoxx 50 by 24.3%. The Bank's market capitalisation at 31 December 2024 stood at 6.9 billion euros.

At the end of 2024, Bankinter, S.A.'s share capital was represented by 898,866,154 fully subscribed and paid shares with a par value of 0.30 euros each. All the shares are represented by book entries, admitted for listing on the Madrid and Barcelona Stock Exchanges and traded on the Spanish continuous market.

Shareholders

Bankinter had 56,547 shareholders at 31 December. Residents in Spain held 54% of the share capital and non-residents the remaining 46%. The registered shareholders with a significant interest are detailed in the attached table. The most significant data on Bankinter's shares in 2024 are described in the following tables:

Significant shareholders (with a declared stake greater than 3% or 1% if they are resident in a tax haven)

New dividend distribution calendar

In a report published on June 19, Bankinter announced the decision of the Board of Directors to change the traditional dividend distribution schedule, which was as follows with respect to the results corresponding to 2024:

The two interim dividends stood at to 0.407 euros per share, for a total amount of 366 million. This figure compares with the three quarterly dividends paid in 2023 amounting to 326 million euros and represents an increase of 12%.

The two Interim dividends will be supplemented by the final dividend approved at the Annual General Meeting scheduled for 27 March 2025, at the proposal of the Board of Directors.

Detail of the dividends distributed and distributable charge to profit for 2024, excluding treasury shares held by the Bank, is included in the table.

American Depositary Receipts (ADR)

Bankinter has a Level 1 ADR programme managed by Bank of New York-Mellon, with 7,031,731 ADRs outstanding at the end of 2024. This allows US residents to invest in foreign companies through a US dollar-denominated product and to receive dividend payments in their own currency.

Dividend distribution calendar

Shareholder's Office

Internal and external information transparency

The "You First" programme has been used for several years to ensure that news about items such as dividend payments, quarterly results or significant event notices about the Bank published with the Spanish National Securities Market Commission (CNMV) reach Bankinter shareholders before they are seen by anybody else.

This programme is one of the main responsibilities of the Shareholder's Office, in addition to responding to proposals and clarifications requested regarding the current or historical share price, the amounts and dates of dividend payments, the contents of the corporate report or the details of the Annual General Meeting.

Additionally, the Office has two other key objectives: generating internal information for managers and supervisors about shareholder composition and ensuring adherence to the Code of Conduct for the Securities Market, which the Bank's employees must observe with regard to Bankinter's actions.

In relation to the contracting and reporting processes, the bank operates in full harmony with the rest of the European markets, following the implementation in Spain of the Reform of the Securities Clearing, Settlement and Registration System.

Strong majority in the Annual General Shareholder's Meeting

On 21 March 2024, the Annual General Meeting was held in mixed format, combining assistance in person and online. The quorum for participation was 69.04%, slightly below other years and the average for IBEX 35 companies. As usual, all the items on the agenda were approved by a large majority.

Investor Relations

Resuming normal operations and more information about ESG criteria

The principles of equality, rigor and transparency inherent to the bank's culture and also required by regulators, have always guided Bankinter's relationship with its investors and analysts, to whom it provides relevant and quality information on the growth of the different businesses, as well as on new strategies, both by type of business and geography. In 2024, the actions developed in the area to comply with these commitments were as follows, among others:

- The quarterly meeting (in January, April, July and October) was maintained to present the Group's results to the investment community via webcast and teleconference. Between 150 and 200 financial analysts and institutional investors, both national and international, usually attend this type of meeting, and there is a Q&A session at the end.
- Bankinter attended the most important international conferences and seminars organised by brokerage firms and investment banks. It has, therefore, been possible to maintain direct and close contacts with all stakeholders (institutional investors, portfolio managers, financial analysts, and private bankers) to inform them about the Bank's performance.
- The usual formal meetings were also held *online* and/or in person (around 300) with institutional investors and financial analysts, both individually and in Groups, organised either by *brokers* or by the *corporate access* departments of the relevant institutions.
- In addition, visits or roadshows were held for current or potential investors in the various financial capitals of the world (New York, London, Paris, Dublin, Frankfurt, Geneva, Milan, etc.)

Information on sustainability

Investor Relations actively collaborates with the Sustainability area to disseminate the bank's metrics and strategies around environmental, social and governance (ESG) criteria. The aim is to facilitate a uniform and clearly increasing flow of information to the different stakeholders.

In recognition of its good sustainability management, the Bank was included in both the European and global versions of the prestigious Dow Jones Sustainability Index for the seventh consecutive year in 2024. Bankinter also appears as one of the most sustainable companies in Spain and in the financial sector on a global scale in various sustainability *rankings*, reports and indices prepared by specialised agencies and *proxy advisors* (firms that advise institutional investors on the management of voting at shareholders' meetings).

Bankinter's success in the field of ESG is due to the bank's historical commitment to and compliance with increasing regulatory requirements.

Rating

Ratings that help reduce the costs of financing

The bank's solid performance in 2024 in terms of solvency, loan-to-deposit ratio, asset quality and profitability translated into maintaining its good *ratings* and outlook, granted by the three credit rating agencies. The good *ratings* help Bankinter to reduce its financing costs in the capital markets and preserve the Bank's strong position in relation to its competitors in this area.

Bankinter's credit ratings as of 31 December, 2024 were as follows:

Moody's *Ratings* Limited.

The long-term issuer credit rating is Baa1, the short-term rating is P-1, and the outlook on both ratings remains at

stable

S&P Global *Ratings*.

The long-term issuer rating improved to A- and the short-term rating remained at A-2. Both with a

stable outlook

DBRS Morningstar.

The long-term rating is A (*low*) and the short-term rating is R-1 (*low*). The outlook remains "positive" for the long term and stable for the short term.

positive

Shareholders' Equity

The bank's risk profile is among the best in Europe

Bankinter is required to maintain minimum ratios of CET1, TIER1 and Total Capital at the consolidated level, which are calculated as the ratio between eligible capital instruments and risk-weighted assets. The requirements for these ratios have several components: The regulatory ones (Pillar 1), those established by the European Central Bank as prudential supervisor (Pillar 2) and the additional ones determined by the macroprudential authorities in the geographies where each entity operates.

Pillar 1 components include four requirements:

- 4.50% of CET1
- 1.50% of additional TIER1 capital instruments
- 2.00% of TIER2 subordinated capital instruments
- 2.50% of CET1 for the Capital Conservation Buffer

The Pillar 2 component refers to the additional Capital requirement established by the prudential supervisor, which must be constituted in the form of CET1 (56.25% of the total), additional TIER1 instruments (18.75%) and subordinated TIER2 instruments (25%).

In December 2024, Bankinter received communication from the ECB with the result of the supervisory review and evaluation process (SREP), which includes the minimum capital requirements applicable from 1 January 2025. According to the communication, Bankinter's risk profile remains unchanged compared to previous years. The entity remains in the Group of Spanish and European banks with the lowest Pillar 2 requirement, which stands at 1.30% (1.39% previously) and must be covered by 0.731% with CET1 (0.782% previously), 0.261% with additional TIER1 instruments (0.244% previously) and 0.325% with subordinated TIER2 instruments

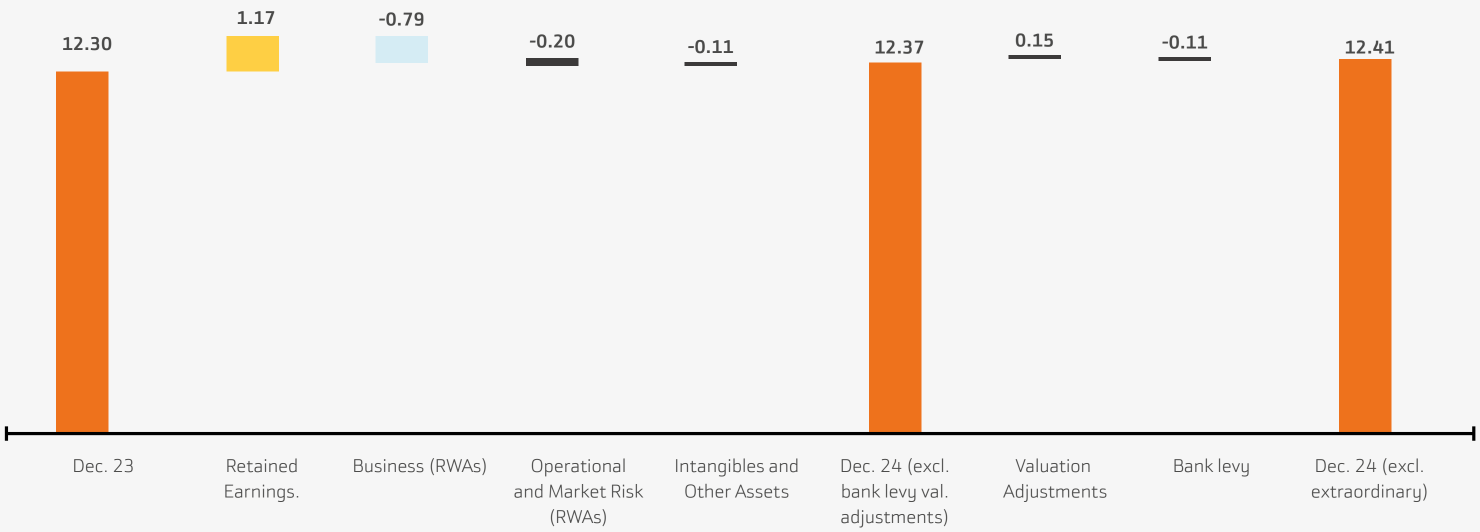
(0.348% the previous year). These figures reflect the bank's strong risk profile, as it has the fourth lowest requirement among all banks under the supervision of the ECB.

In relation to the requirements of the macro-prudential regulations, Bankinter was subject to the countercyclical capital buffer established by the Central Bank of Ireland and the systemic risk buffer established by the Bank of Portugal at the end of 2024, which raised the minimum CET1 requirement by 0.078% and 0.147%, respectively.

Taking into account all of the above, as of January 1, 2025, the minimum requirements for the CET1 and Total capital ratios are 7.96% and 12.03%, respectively (8.01% and 12.12%, at the end of 2024).

Moreover, in December 2024, Bankinter received notification of the Minimum Requirement for Eligible Liabilities (MREL) set by the Single Resolution Board for 2024. This decision sets a total binding MREL requirement - which must be met from 17 December 2024 - of 20.31% of its total risk exposure amount (TREA) and 6.39% of its leverage ratio exposure (LRE). In addition, it is established that, from the same date, subordinated instruments must be used to comply with the MREL equivalent to 15.80% of the TREA and 6.39% of the LRE.

Variations in the CET1 ratio



Throughout 2024, the Group continued to build the buffer of eligible liabilities to meet the MREL by generating organic capital, issuing eligible instruments and managing its balance sheet. At year-end, the level of MREL-eligible instruments stood at 24.04% (20.34% excluding the capital to be dedicated to cover the combined buffer requirement of 2.7% of risk-weighted assets), and 7.88% of the leverage ratio exposure.

Improving the level of solvency

In 2024, Bankinter maintained the active and efficient management of its capital as one of its strategic priorities. The aim is to strengthen its capital adequacy position, fostering the flow of credit to households and companies without affecting its capital ratios and preserving its usual 50% *pay out* level.

The Group's highest-quality capital, represented by the CET1 ratio (the ratio of *Common Equity Tier 1* capital to risk-weighted assets), was 12.41% at the end of the year, 11 basis points above the previous year's ratio. The increase was possible despite the growth in customer credits and the extraordinary bank levy.

The positive trends in the solvency level was supported by good results and the maintenance of the risk profile. The positive result for the year allowed the retention of 117 basis points of capital after applying the Group's traditional dividend policy (50% of profit).

Demand for credit was satisfactory. Investment in companies experienced strong growth, both nationally and internationally. The mortgage business (mitigated for capital purposes due to guarantees) continued, considering all geographies, to grow above the sector. There was growth in all other activities. As a result, business growth detracted 79 basis points from the CET1 ratio.

With regard to operational risks, which is estimated according to the average of elements related to the Group's gross operating income over the last three years, it subtracted 20 basis points. Its year-on-year growth is correlated with the growth of the gross operating income. The CET's remaining items (those related to portfolios recorded at fair value) generated 15 basis points of CET1 and the bank levy subtracted 11 basis points.

At the end of the reporting period, the CET1 and Total Capital ratios stood above the minimum requirement by 440 basis points (or 1.9 billion euros) and 415 basis points (or 1.8 billion euros), respectively.

Business in Spain

Corporate & SME Banking

Strong improvement in customer acquisition and fees, and risk containment

The Corporate & SME Banking business closed another year with a very solid performance. Pre-tax profit was EUR 850 million, an increase of 0.4%. The gross operating income of the area also grew significantly (+2%). Investments grew by 7%, which enabled the business share to rise up by 6.4%, two-tenths more than in the previous year. The results were particularly positive in the case of income from fees (+9%) and customer acquisition (+19%). To complete the favourable tone of the year, risks remained very contained, with no signs of deterioration in the non-performing loan ratio, despite the fact that the rise in interest rates could affect customers' ability to pay. There were also hardly any impacts derived from the uncertainties and geopolitical risks to which the bank was exposed throughout the year (the on-going wars in Ukraine and the Middle East and political movements in the USA, Germany and France), which the markets seem to have normalised.

Moreover, the activity associated with the European *Next Generation* funds grew at very high rates. Deals and transactions worth 690 million euros were signed, 78% more than in 2023, which indicates significant progress in the unfolding of the programme.

Business lines

By Business Area, the activity was quite strong in the Large-corporate Banking and International Banking areas.

Large-corporate Banking saw a record gross operating income, mainly thanks to the excellent performance of fees. In this line of business, a double differentiation strategy worked especially well: strengthening investments in the public sector and focusing on expert advice (structured transactions, project finance, etc.).

Moreover, the International Banking area performed well in a particularly outstanding year, with very notable growth in investments, earnings from fees and profits (it contributed 29% of the gross operating income of Corporate & SME Banking). The Supply Chain Finance programme, launched in 2022 and a high added value tool for supply chain management and financing, continued to be a differentiating element in its activity. The International Banking business line celebrated its tenth anniversary in 2024. Prior to 2014, the Bank was already engaged in international corporate operations, but it was from its classification as a priority business line that it started to develop as a key driver of the Bank. The focus on specialisation and training of the entire network has been key to the takeoff, continued growth and consolidation of the International Banking area in recent years.

The Medium-sized Business and SME areas had a more moderate, but still positive, growth in 2024, with significant progress in fees and customer acquisition, respectively. For another year, in the case of SMEs, the Business Plan, a model that simplifies the range of accounts and establishes a transparent and progressive fee policy, was a catalyst for activity. 66% of SMEs and 86% of new customers are associated with the Business Plan, which provides clarity to their relationship with the bank.

The transactional banking business (payments, collections, guarantees, *factoring*, etc.) also recorded significant growth rates. Banca Partner, for its part, had an outstanding performance in terms of acquisition (it increased by 17%, above the level of the branch network). The growth of its business indicates that there are still growth opportunities in the market.

Expectations

In addition to many other factors, such as the national and international economic environment, growth expectations for 2025 will also be influenced by the development of sustainability principles (environmental, social and governance (ESG)). The implementation of the European Directive on Corporate Sustainability Reporting (CSRD), along with other regulations, compels companies to adapt their processes and products, generating the resulting demand for financing facilities. It is expected that the trend will initially impact the investment strategy of large enterprises and will gradually filter down to all other enterprises, including those in the supply chain, which is why it occupies a priority position in the Bank's commercial management policy.

"

Activity was particularly strong in the International Banking and Large-corporate Banking areas, achieving a record gross operating income.

Commercial Retail Banking

A spectacular year, with a 59% growth in profits

Bankinter's activity focused on individuals generated pre-tax profits of 747 million euros in 2024, representing a 59% increase over the previous year. The gross operating income of the Commercial Retail Banking area stood at 1.3 billion euros, with a growth of 28%, driven by the two large segments into which the activity is subdivided: Wealth Management, where it rose by 46% and Retail Banking (+22%).

To achieve these spectacular results, the effort made in customer acquisition was decisive: 139,779 new customers joined the bank throughout the year, 14% more than in 2023. Never before has such a high figure been achieved in just twelve months. As of 31 December, Bankinter had 995,550 customers (individuals).

One of the challenges for 2024 was to significantly increase the earnings from fees. We achieved this objective. The Commercial Retail Banking area earned 387 million euros in fees, which represents a 13% increase when compared to 2023. It is worth highlighting the increase in earnings from fees of the investment fund, equity and insurance product businesses. The net interest margin amounted to 877 million (+27%).

Two other key objectives were also achieved: customer credit grew by 669 million euros, as compared to a decrease of 736 million in the previous year. Similarly, customer deposits amounted to 43 billion euros, with an increase of 2.2% and, most importantly, with a decrease in their cost from September onwards.

Products

The Salary Account and mortgage loans continued to be the main drivers of customer acquisition. In the second case, Bankinter maintained its market share, with its volume of loans for home purchases growing in the same proportion as the sector as a whole.

These two products were joined by the new Digital Account, with no fees and no need for setting up direct deposits or a minimum monthly income deposited, of which 28,056 were opened. The Dual Mortgage, launched at the end of 2023, which allows customers to choose which part of the loan is subject to a fixed rate and which to a variable rate, totalled 258 million euros as of 31 December.

Consumer credit rose in terms of balance and activity. Customers arranged credit facilities worth 988 million euros (+13%).

There are two investment funds with an outstanding performance: Bankinter Premium Fixed Income, which became the third in Spain in terms of inflows and the innovative Bankinter Investment Inversión Alternativa I FCR, which can be opened from just 10,000 euros, very popular among small investors.

The DANA Flash Flood and Artificial Intelligence

As soon as the DANA Flash Flood hit Valencia on 29 October, Bankinter established specific telephone support services to assist the commercial network and customers. Although most branches in the affected areas did not have to interrupt their activities, efforts had to be redoubled to meet the demanded services. In particular, the Bank helped arrange the ICO (Official Credit Institute) funding for material damages, as well as the payment holiday on mortgages, processing own insurance policies and those of the Insurance Compensation Consortium, as well as allowing holders to redeem their pension funds early if needed.

During 2024, Bankinter continued to exploit the possibilities offered by artificial intelligence, which is already present in the day-to-day management of sales and advice, through the bank's CRM, the platform that helps manage customer relationships.

Expectations

Bankinter will combine its digital capabilities under a single brand, merging with its digital subsidiary EVO in 2025 for such purposes. The merger, which includes the technological integration and the transfer of customers to the new "Digital Organisation" unit, is expected to be completed in July. From then onwards, former EVO customers will become Bankinter's customers and will have the opportunity to benefit from its products, services and branches.

Other goals for 2025 are:

- Enhance the financial services offered by the Wealth Management area.
- Grow substantially in terms of customer credit and customer deposits.
- Promote the marketing of value-added products.

Wealth Management

New *Family office* service and over 6 billion euros in customer credit

In February, the *Family office* was launched, a comprehensive global family wealth consulting service. Target customers are families with assets worth over forty million euros and the assets covered by the service are of the financial, real estate and alternative customer credit type.

Customer credit exceeded 6 billion euros, a record figure in this business. It also experienced a significant increase in new assets: 3.49 billion, reaching 65 billion, with an increase of almost 6 billion as compared to 2023.

In 2024, the investment fund balances stood at 23.9 billion euros, 18.30% more than the previous year.

Retail Banking

Salary Accounts and mortgages boosted customer acquisition

In 2024, the area reached 939,811 active customers, representing an 8.4% increase when compared to the previous year. It is also worth noting the customer acquisition figure, with 134,780 new customers (+15%). The two main funnels were, once again, the Salary Account and mortgage loans (including the new Dual Mortgage), in addition to the launch of the Digital Account. Specifically, 57,648 Salary Accounts were opened and 13,951 mortgage loans were arranged, for a total value of 2.6 billion euros.

Investment funds experienced strong growth, with business activity standing at a total of 2 billion euros and a 13.8% increase in the volume of customers. Bankinter Investment Inversión Alternativa I FCR performed very well, a fund that provides access to a wide range of alternative investments, previously restricted to high net worth or institutional investors.

Retail Banking customer wealth amounted to 50.9 billion euros at the end of the year, a figure 12% higher than at the end of 2023.

Large-corporate Banking

Improvement in gross operating income and customer credit

Last year was a record year in terms of the gross operating income of the Large-Corporate segment, reaching 492 million euros, with a growth of 2.61% compared to 2023.

This improvement was clearly supported by the increase in fees, which rose by 7.40%, driven by tax loans, international business and guarantees.

Particularly noteworthy at the end of 2024 was the almost double-digit growth in the area of customer credit, which increased by 1.5 billion euros at the end of the year, with a focus on the international business and *factoring*.

Credit recovers the path to growth

After a 2023 decline in investments, last year Bankinter resumed the path to growth in credit facilities for medium-sized enterprises, increasing the portfolio by 363 million euros, 4.5% when compared to the previous year.

The target gross operating income was achieved, hitting the 363 million euros mark, mainly thanks to the strong increase in fees, which reached 107 million euros, growing by 10.2% over 2023, which offsets part of the impairment in the net interest margin resulting from the fall in interest rates.

By the end of 2024, total resources reached 8.5 billion euros (+7.4%), thanks to the improved performance of intermediation balances (+4.3%) and customer deposits (+7.6%), along with controlled cost increases (+1.04%).

SMEs

Boosting customer acquisition

Revenues in the area increased by 5.35% and gross operating income hit 341.9 million euros, thanks to the boost in commercial activity, which resulted in an 8.95% rise in fees, up to 111.2 million euros. Pre-tax profit exceeded 195 million euros.

In 2024, the "Plan Empresas Remunerada" current account was launched for new customers. 3% the first year and 1.5% the second year, up to a maximum of 50,000 euros. Customers must remain a customer of Bankinter over a certain period of time, choosing the best alternative from one of seven options available and using a very simple tool.

For the first time, the Business area was the focus of an advertising campaign, designed to drive customer acquisition, taking advantage of the significant improvement in productivity resulting from the implementation of the Business Plan. These actions helped attract 14,936 new customers, representing a 25.7% increase over the previous year.

Bankinter Investment

Leadership in alternative investment in Spain and Portugal

It has been a decade since Bankinter took on the challenge and responsibility of seeking investment alternatives for its Wealth Management customers, making a firm commitment to alternative investments and opening a new path towards investing a significant part of family savings in real assets and distinctive business projects.

During this time, Bankinter Investment has established itself as the largest collective platform for direct investment in the real economy of the Iberian Peninsula. In 2024, the bank's customers committed capital exceeded 5 billion euros, which allowed it to reach almost 8 billion euros in customer wealth. The platform already has twenty-eight vehicles through twelve different investment strategies, with assets in fourteen countries and a base of more than 12,000 investors across Spain and Portugal.

This investment and asset base enabled distributions to investors of over 225 million euros, bringing the total to 1.2 billion euros since 2016.

Focus on delegated management

The process of consolidating leadership was accompanied mainly by a high degree of innovation, exploring new paths and further strengthening the position in the alternative investment sector.

We were the first financial institution to launch a fund of funds with a delegated management service of alternative investments registered in Spain and aimed at customers with a minimum investment of 10,000 euros. This product was consolidated in 2024 with 410 million euros committed by more than 7,000 Spanish and Portuguese families. The product will be distributed until February 2025.

Strictly following the guidelines established in its investment policy, this fund of funds (Bankinter Investment Inversión Alternativa I FCR) has been building a highly diversified portfolio at the sector and geography level, with exposure to sectors as diverse as infrastructure, technology, rental housing, shopping centres, industrial property, agriculture and energy transition, both in Europe and the United States.

In addition, new alternatives have been opened for more sophisticated and/or higher net worth customers, offering the possibility of investing in different structures at the vehicle level or even co-investing at the asset level, which allows them to optimise the comprehensive management of their assets. Here are some examples:

- Launch of the first diversified venture capital company in Spain for an amount of forty million euros.
- Launch of three venture capital companies exclusively for customers of the Basque Country, Catalonia, Levante and the Balearic Islands, which will allow them not only to access a diversified portfolio of alternative investments from Bankinter Investment, but also to ensure that at least 20% of their investment commitment goes to assets or companies based in these geographies. Therefore, customers will participate first-hand in the development of the business network of the regions in which they are based.
- Progress achieved on structuring and management of various individual or family venture capital companies, in which customers define the investment policy and Bankinter Investment guarantees them access to completely different opportunities, based on the premises set forth by them.

Theme-based investment vehicles

In parallel to the above, Bankinter Investment has continued to develop its main line of investments in recent years, which has placed it in a leading position in the alternative investment market of the Iberian Peninsula, with the launch of theme-based investment vehicles aimed at institutional or high-net-worth investors. This has been the case for the following projects:

- Landa Fund. It focuses on the acquisition of agricultural land, strengthening, professionalising and contributing to the development of one of the critical sectors within the national economy. With this new investment vehicle, Bankinter Investment has partnered with the world's leading investor in agricultural and forestry land, Nuveen Natural Capital, an entity wholly owned by TIAA (the largest pension fund in the United States) and with more than 13.7 billion euros invested in this type of assets in America, Asia, Europe and Oceania.

- Horizon Estate. Dedicated to global investment in the real estate sector (commercial, residential, industrial or office surfaces, among others). The first investment was made on residential assets in the city centre of Milan, once again giving customers access to completely unique transactions. In this case, the partner is Partners Group, one of the world's leading alternative investment managers, with more than twenty years of experience and 149 billion euros in customer wealth in sectors such as infrastructure, real estate, venture capital and debt.

- Orion Fund. Second version of the technology sector investment vehicle, with a strategy that focuses on giving customers access to companies that help transform traditional business models by leveraging technology. The investment partner is once again Kanoar, present on the platform since 2019 with MVB Fund.

A legacy for the future

Bankinter Investment's mission is not only to optimise the risk-return of its customers' investments, but also to generate a real, significant and tangible impact that contributes to the favourable development of society, through projects that help solve the most pressing social challenges of the present and the future.

Several examples illustrate this, including an investment of over 3 billion euros in renewable energy to reduce Spain and Portugal's energy dependence; initiatives to drive the development of student talent (future professionals) through a premium student housing platform in major university cities; progress achieved in communication, water, and healthcare infrastructures; and the creation of thousands of jobs in the catering, logistics, and retail sectors.

Bankinter Investment is committed to bringing about a positive transformation in society and leaving a legacy for the future.

Window of opportunity

2025 opens a new horizon in the field of alternative investments. The current macroeconomic scenarios, with the recent cuts in interest rates and the outlook for moderation of interest rates over the coming months are the catalysts to generating activity in corporate operations in different sectors and are starting to facilitating access to more attractive financing facilities once again.

In addition, Bankinter Investment's portfolio is nearing the appropriate maturation stage in some sectors, enabling the assessment of possible divestitures of assets held by the investment vehicles.

The aim is to make progress on identifying differential investment opportunities and continue growing in the field of alternative investments.

Corporate operations

The Bankinter Investment team offers investment banking advice, both in the areas related to corporate operations, as well as in areas related to capital and financing. The bank has already provided advice on financing operations worth 2.6 billion euros, of which more than 900 million have been allocated to sectors as important for development as renewable energy and infrastructure.

On the corporate advisory side, Bankinter Investment closed 2024 with record fees and figures related to number of transactions in mergers and acquisitions (such as the partial sale of Onix Cerámica to Artá Capital or the acquisition of Bemobile by Henko Capital), capital markets (such as the capital increase with preferential subscription rights of Merlin Properties SOCIMI, S.A. for an amount of 920 million euros or the bond issue of Redeia Corporación, S.A. for 500 million euros) and in real-estate advisory transactions (such as the sale of the Hotel Mayorazgo or a significant portfolio of residential assets).

International Banking

Ten years of a successful business model

The activity celebrated its tenth anniversary in 2024, with a very successful commercial distribution model, reaching an average Loan portfolio balance of 10 billion euros, and representing a notable increase of 14.1% compared to the figures at the close of 2023. The gross operating income rose to 446 million euros (+10.40%), a figure accounting for 29% of the gross operating income of the Corporate & SME Banking area.

In the course of the financial year, there was significant growth in the number of international simple payments and collections brokered (+7.4%), the key driver of our fee income, which amounted to 117 million euros (+5%).

In the area of special operations, the growth experienced in the export financing business with official support deserves special mention, with a 69% increase in the financing balance with coverage by export credit agencies (ECAs).

The International Banking area continues to focus on improving the working capital of our customers with the *Supply Chain Finance* tool, including the first version of International *Factoring* features in the tool, while upgrading and improving the application every day to manage more and more businesses, whether in euros or any other convertible currency.

Capital Markets

High loan-to-deposit ratio and more assets under management

Bankinter holds a strong loan-to-deposit ratio. The resources represent more than 105% of the Group's customer credit. In 2024, Bankinter went to the institutional market on two occasions with great success to issue bonds worth 950 million euros.

The Treasury Department continued to respond to the needs of our customers in managing their currency, fixed-income and interest rate derivatives operations.

The volume of investment funds managed by Bankinter Asset Management reached 15.4 billion euros on 31 December, 25% more than at the end of 2023. The Bankinter Premium Fixed Income fund exceeded 3 billion in assets.

Volume of investment funds managed by Bankinter Asset Management

15

billion euros

Asset Management

Record highs in revenue and profits

Customer wealth reached 25 billion euros in 2024, including investment vehicles and discretionary management portfolios. Growth compared to the previous year was 21%, thanks to a commercial activity of around 2.6 billion euros.

As a result of all this, Bankinter Asset Management earned 146 million euros in the year (+31%) and generated a pre-tax profit of 81 million euros (+46%). In both cases, these are historical highs for the fund manager.

The star investment fund of the year was Bankinter Premium Fixed Income, which surpassed 3 billion euros in assets 14 months after its launch, becoming one of the best-selling funds in Spain in the entire industry.

"

The star investment fund of the year was Bankinter Premium Fixed Income, which exceeded 3 billion euros in assets 14 months after its launch.

Investment funds

Record portfolio and revenues

The positive performance of the markets, together with the intense commercial activity, which marked a historical record with 4.8 billion euros, made it possible for the investment portfolio to exceed 36 billion euros for the first time, with a growth of 25% over 2023.

The investment fund business also hit a record figure in revenue, reaching 243 million euros, representing a 28% increase. This increase made a positive impact on the gradual growth of the portfolio and the success fees of the Platea Funds and Investment Services.

One of the year's highlights was the more than 3 billion euros raised by the Bankinter Premium Fixed Income Fund launched by Bankinter Asset Management at the end of 2023, as mentioned in the previous section, with a view to enriching the portfolio's products and adapting it to different investment profiles, taking advantage of the existing market opportunities.

Fixed Income

Growth and consolidation

In 2024, investors continued to identify opportunities in fixed income investments. The deposited portfolio volume remained around 7 billion euros, showing a slight decrease from December 2023 due to the redemption of bonds and bills and a drop in the trading activity.

The business's revenues experienced record growth, reaching 22 million euros, which is 11% more than the previous year.

The main milestones include the consolidation of the various technical and commercial initiatives to strengthen the business that began in 2023, as well as the launch of the fixed-income platform of the new Bankinter Broker, which adds features and improves the user experience.

The portfolio reaches historic highs

In 2024, the deposited portfolio grew by 30%, reaching an all-time high of 30 billion euros. This significant growth is mainly attributed to the positive market effect, but also to vigorous commercial activity, which surpassed that of 2023.

Business revenues also received a strong boost, reaching 67 million euros, 20% more than the previous year. The revenues from international custody and transaction services performed particularly well.

In 2024, the Broker 0 Service was consolidated, which already makes a significant contribution to the income statement and allows customers to process their transactions in the national market at no cost, and to obtain additional earnings from their portfolio with security lending transactions. The Broker website was on par with all other of the bank's websites in terms of technology and brand image, adding features and improving the customer's experience.

Bankinter Consumer Finance

Important advances in Portugal and Ireland

In 2024, the Universo *joint venture* became effective, owned equally by Bankinter Consumer Finance and the Portuguese financial group Sonae and which aims to be a leader in the Portuguese consumer credit market. The first loans began to be offered in January.

The Enjoy Aena card was launched during the summer, the result of an agreement with the Spanish airport operator. This is a fully *online* platform, in which customers choose how to pay, offering a 5% cashback on purchases made at airports and 2% on other purchases, provided they are made using the *revolving* deferred payment method.

Avant Money was established as a banking subsidiary in Ireland, expanding the business strategy in the country, which will include all types of financial products and services for retail customers.

> "Universo, owned equally by Bankinter Consumer Finance and Sonae, aims to be the leader in the Portuguese consumer credit market.

Insurance and Pension Plans

Consolidation of the Single Insurance Account

2024 was the year of consolidation of the Single Insurance Account. As of 31 December, more than 10,000 customers were benefiting from its advantages: monthly payment of insurance premiums at no cost and access to great discounts for customers with insurance policies taken out with Bankinter.

Important steps were also taken in the digitalisation of the Insurance and Pensions business, improving the processes for taking out insurance in the life and home insurance policy lines, while expanding the bank's digital products and services.

In the case of pension plans and EPSVs (voluntary social security entities), it is worth highlighting the launch of BK Self-Employed, a simplified employment pension plan for the self-employed. The year ended with a new record for customer wealth, exceeding 3.6 billion euros.

Agent Network

Improved profitability

In 2024, the Agent Network contributed 59 million euros to Bankinter's pre-tax profit, an improvement of 12% compared to the previous year. The network is made up of over 350 professionals, who partner with the bank to offer financial services, with 46,990 active customers as of 31 December, 4.2% more than in 2023.

The average balance managed by the agents increased to 65 million euros in 2024, thanks to the increased demands and professionalisation of profiles. In 2024, significant figures were achieved in the balance of investment funds, reaching 10.3 billion euros, representing a 16.41% increase.

The customer credit volume also increased from 1.9 billion to 2 billion euros, a 3.7% increase.

Partner Banking

More than 50,000 active customers

In 2024, the gross operating income of this activity exceeded 104 million euros (+12%), mainly driven by partnership agreements with large corporations, where the bank sets up virtual offices to create tailored products and services for employees, customers and suppliers, in which profits are shared equally.

Particularly noteworthy was the performance in the Commercial Banking area with a 17% growth in gross operating income. New mortgages, loans and credit amounted to 531 million euros, 8% more than in 2023. As of 31 December, the total customer credit reached 2.2 billion euros (+9%).

Customer acquisition reached a new record level: 6.827, 17% more than the previous year, thanks to existing partners and the seventeen partners who joined in 2024. Thirty years after its creation, Partner Bank already works with more than 50,000 active customers.

The customer credit of the institutional business grew by more than 12%.

Telephone Banking

New services for comprehensive customer management

Telephone Banking fully focuses on commercial customer management. Remote tutors coordinate with the on-site network to ensure the comprehensive management of all areas with common objectives, based on engagement, development and recruitment.

The teams of experts continue to focus on managing and retaining value-added products, investment funds, pension funds, equity, insurance, mortgage production, asset renewals, GIP, transactional business and international business.

The Omnichannel Mortgage has been opened on the website for potential customers, which provides support throughout the operation, just as occurs with the online registration process.

Part of the ongoing improvements to the Virtual Assistant include the migration of its natural language processing engine to a more modern one, with the aim of improving the customer experience throughout 2025. The resolution rate stood at around 90%.

Up to three million calls were handled. Of these calls, 1.7 million were made by actual or potential customers, with a service level of 93%; two out of three were answered within twenty seconds and the average overall waiting time did not exceed 52 seconds. The other 1.3 million calls were made by remote advisors and experts for commercial and management purposes.

Since May 2024, the date from which this information is available, the Telephone Banking service has handled a total of 573,291 unique customers. 80% were satisfied with the service provided and 66% would recommend it. 86% indicated that their issue was resolved during the call.

EVO Banco

An outstanding exercise before the merger with Bankinter

EVO Banco completed its last year as a 100% digital subsidiary in 2024. After five years operating as an independent entity, EVO will merge with Bankinter in 2025. This integration aims to create a new value proposition that combines EVO's digital capabilities with Bankinter's financial and commercial strength in the Spanish market.

EVO closed its last financial year with a total asset volume of 5 billion euros, with a 16% growth compared to the 4.3 billion of the previous year.

In financial terms, the subsidiary achieved significant improvements in the main lines of the income statement. Gross operating income stood at 80.84 million euros, 22% more than at the end of 2023, while profit after tax was in the positive figures: 8.1 million euros, compared to -0.5 million in the previous year.

Customer credits and funds

In terms of the balance sheet, EVO Banco demonstrated remarkable strength in its capacity for growth. The increase in customer credit stands out, which rose from 3.3 to 3.8 billion euros (+13.35%). The balance of customer funds hit the 4.6 billion euros mark, 15% more than in 2023.

The expansion of business activity advanced alongside the corporate integration and technological and commercial migration process, set to conclude in 2025. In this context, intensive management procedures were rolled out to guarantee the suitable handling of the legal, technical and commercial elements essential to guarantee the operation's successful execution.

Business in other countries

> Luxembourg

Bankinter Portugal

Double-digit growth in income and profits

Bankinter Portugal continued to grow at a steady pace in 2024. Its pre-tax profit rose to 195.2 million euros, a 17.9% increase as compared to 2023. The gross operating income increased by 13.0%, to 346.2 million euros, while profit lines increased by 15.4%, to 235.5 million euros. Operating costs, meanwhile, rose by 8.4 million euros to 110.8 million euros, largely due to the impact of salary increases, new hires, technological investments and inflation.

The high pace of activity led to growth followed by a considerable improvement in the cost-to-income ratio, which stood at 32.3%, an improvement of 139 basis points when compared to the year 2023. The NPL ratio stood at 1.32%, which represents a slight increase of 0.07%. However, this figure is better than the Portuguese market's rate of 2.6% during the third quarter of 2024, according to the Bank of Portugal's figures.

With regard to the contribution to the gross operating income by business areas, the Commercial Retail Banking area represented 47.80%, Corporate & SME Banking represented 39.14% and Bankinter Consumer Finance 13.06%. The details of the main activities of the subsidiary are as follows:

Commercial Banking. The strategic lines of business registered significant growth. There was also a notable increase in off-balance sheet resources, reaching 780 million euros, representing a 15.2% increase. The credit portfolio also evolved favourably, with an increase of 6.7%. Another distinguishing feature was the dynamism in customer acquisition and management, with a growing emphasis on the exclusively digital profile. In this sense, 2024 was a year during which a series of tools were developed, such as the cognitive assistant (BIA - Bankinter Interactive Assistant), which improves the experience and effectiveness of the customer service. With regard to products, the mortgage loan offering was enhanced with an omni-channel solution, which allows customers to choose between digital and physical options throughout the process.

Corporate & SME Banking. A year on, the Corporate network's turnover grew (+14.9%), hitting the 3.9 billion euros mark, in a context of strong acquisition dynamics, with the number of customers under management once again increasing by double digits (+15.6%). The gross operating income increased by 72.2%. In the area of medium-sized enterprises, there was an increase in the volume of business managed, up to 2.2 billion euros (+12.6%). The Business segment reached 2.8 billion euros in managed business volume and 1.8 billion euros in total resources. For its part, International Business completed one of its best years, despite geopolitical tensions. Revenue increased by 39.3% compared to 2023.

Pre-tax profit reached a figure of

195.2
million euros
(+17.9%)

Bankinter Investment. Following its differentiation strategy, in 2024 Bankinter Investment structured and distributed three private equity funds in Portugal in sectors as diverse as agriculture, real estate in OECD countries and funds of funds, achieving a total placement of 196 million euros among Portuguese investors in six years. In addition, Bankinter Investment structured Greenvolt's debt issue (50 million euros) on Spain's MARF. In the area of mergers and acquisitions, it provided advice to the Magnum fund on its concentration strategy in the fertiliser sector.

Bankinter Consumer Finance. It is worth noting the growth of the gross operating income by more than 50% as compared to the figures of 2023, as well as the growth of over 15% in the loan business volume (gross production) as compared to 2023, as well as the credit risk exposure, exceeding 289 million euros in balances granted. With regard to payment methods, self-service features for customers have been improved with the launch of online debit and credit card applications, available on the website and in the app, as well as the options to pay in instalments with their current accounts. In the personal loan business, Crédito Expresso was launched, a fully online product, whose objective is to facilitate any short-term liquidity needs for customers.

Bankinter Asset Management. Despite competition in the term deposit and similar product segment, the area benefited from the recovery of the financial markets, with assets under management at the end of the reporting period worth 1.3 billion euros, representing an 11% increase. In the investment funds segment, the volume under management was of approximately 408 million euros, 14% more than in 2023. In the third-party portfolio management business, the amount of assets under management was of 868 million euros, a 10% increase. In this case, the recovery of financial markets more than offset for the lack of new business, due to strong competition from term deposits.

Bankinter Life Insurance. It was a year of strong growth. Issued premiums increased by 108% when compared to 2023, i.e., performing much better than the market, which stood at 37%. Such a significant growth demonstrates the resilience and confidence of customers in risk and investment products. It is also worth highlighting the success of the guaranteed return capital investment insurance, with an increase of 101%, taking advantage of the positive trends in interest rates. Life insurance linked to consumer and business credit also performed very positively, with growth of 56% and 45%, respectively. In addition, opportunities in the stock and bond markets were leveraged for customers with a less conservative loans profile, with high returns for their subscribers.

Bankinter in Ireland

Integration and strong growth of customer credit and profitability

In 2024, five years after Bankinter's arrival in Ireland through its subsidiary Avantcard DAC (which operates as Avant Money), the bank commenced to convert Avant Money into the Irish branch of Bankinter through the official process. The integration will enable the bank to introduce a broader range of banking products in Ireland.

In parallel, Avant Money experienced strong growth in its main business indicators in the Irish market. Gross loan balances to customers reached 3.8 billion euros, 27% more than the previous year. Pre-tax profit stood at 40.7 million euros, 23% more than in 2023.

Gross operating income stood at 103.1 million euros, 6% more than the previous year. The net interest margin rose by 7% to 99.9 million euros, while net fees increased by 6% to 9.6 million euros.

Moreover, general expenses amounted to 49.4 million euros, representing an 8% increase, mainly due to new hires and the repayment of the investment in technology required for the company's growth. The cost-to-income ratio stood at 47.9%, compared to 47.0% in 2023.

Bankinter Ireland's performance in the area of credit risk was also very solid. The cost of credit risk amounted to 13.0 million euros, representing 0.38% of average gross balances for the year. The non-performing loan ratio closed the year at 0.32%, 4 basis points lower than in 2023.

Consumer credit and mortgages

The dynamism of the Irish business sector benefited both consumer credit and mortgage activity. In consumer finance, credit card and personal loan portfolios reached 972 million euros, representing an increase of 17%. The bank generated 356 million euros of new loans, up 28% year-on-year, outpacing industry growth, according to data from the Banking and Payments Federation of Ireland (BPFI) as of November 2024. The company estimates a 7% share of the overall personal credit market, including credit unions. The consumer finance default rate stood at 1.26% at the end of the year, 8 basis points lower than in 2023. The cost of credit risk for the portfolio was 1.69% of average balances during the year.

With regard to mortgages, the total balances reached 2.9 billion euros on December 2024, representing a 31% increase. The company generated 846 million euros in new mortgages, 13% more than the previous year, outperforming the market as a whole, which remained stable, according to BPFI data. The bank estimates a 7% market share in new mortgage originations. These figures were consistent with the solid credit risk management procedures. At the end of the reporting period, the delinquency rate in the mortgage portfolio stood at 0.01%.

> "In 2024, the official process to convert Avant Money into the Irish branch of Bankinter began.

Bankinter Luxembourg

Record volume of assets under management and under custody

Bankinter continues to grow in Europe's main financial centre, known for its economic and political stability and notable for being one of the few countries in the world with an AAA credit rating.

In this unique ecosystem for the banking sector, where more than 120 financial institutions from twenty-five different countries compete, Bankinter achieved good figures in 2024.

The Luxembourg subsidiary exceeded previous levels of assets under management, which increased by 23%, as well as assets under custody, which grew by 22%, setting records in both areas. Customer wealth in SICAVs increased by 13%.

The year ended with the implementation of the transactional website, which allowed the bank to streamline the services for its customers in terms of agility, efficiency and security.

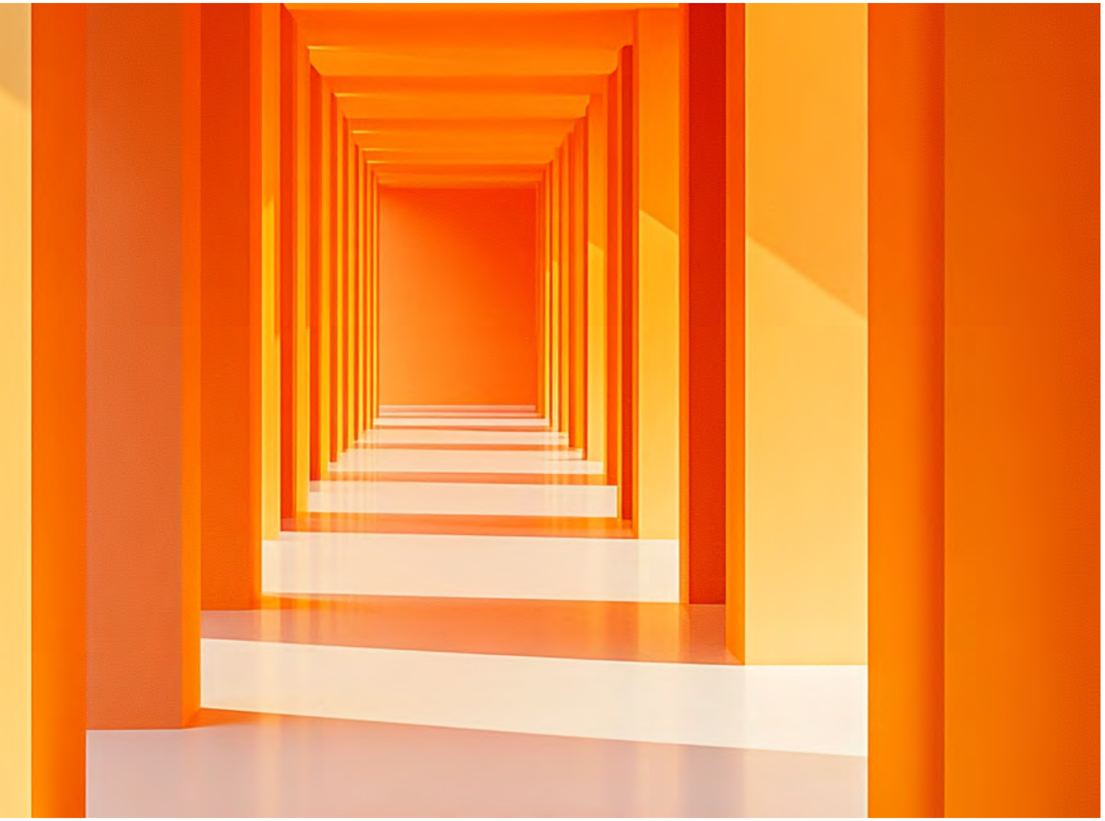
Quality

Quality

Achieving day-to-day excellence to become exceptional



The bank's goal is to understand the customer's voice and their perception of all interactions with the bank in order to anticipate their needs and react immediately, integrating this platform with the CRM area.

Bankinter aims to achieve excellence in its relationship with internal and external customers. This is achieved with a combination of external quality, which refers to the customer's perception of the bank, and internal quality, which aims to understand the employees' opinion of the company, focusing on several key aspects to ensure a positive experience for both customers and employees.

Bankinter stands out for its commitment to providing personalised service and understanding the individual needs of its customers. This approach allows Bankinter to tailor its financial services and products to each person's specific circumstances and goals. To achieve this, it is essential to constantly listen to the customer, with the implementation of a new platform that allows the combination of their interactions:

- This process was based on conducting **monthly telephone surveys,** working with various suppliers, conducting digital surveys and email surveys, to assess the degree of recommendation of the bank, manager and branch.

- **Predictive quality models** are integrated to identify Bankinter's promoters and detractors without relying exclusively on surveys, moving from reactive to proactive management.

- Digital asset surveys **are conducted to assess customer experience at different points in their interaction with the Bank's digital assets.**

- **Surveys are also conducted on the use of the telephone banking service,** to find out how customers interact through this channel.

- Using a **properly trained artificial intelligence tool** , all qualitative information provided in open questions is classified and ordered in all survey formats and channels.

Improved perception

In 2024, customer perception, measured in terms of the NPS (Net Promoter Score), stood at 47.4 (+4.9% as compared with 2023), with a growth of 14.2% over the last four years. Spain achieved a 49.0 rating (+5.8%) with a 60.2% improvement in perceived quality of the branch network. Bankinter Portugal achieved a 41.3 rating (+14.7%) thanks to its excellent performance.

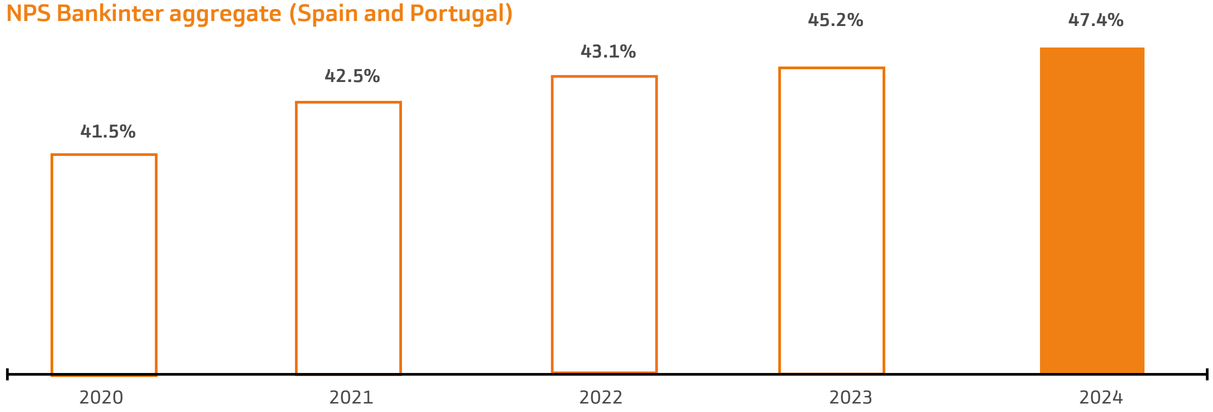
The recommendation index

In Spain, 58.0% of customers (+4.1%) said they would recommend Bankinter and dissatisfied customers stood at 9.0%, which represents 4.3% less as compared with 2023. In Portugal, the percentage of recommending customers was 50.9% (+4.5%) and that of dissatisfied customers was 9.6% (-24.4%).

By relationship channels with the bank, the increase in the level of customer satisfaction on websites and apps stands out, with an NPS of 54.6% (+2.8%) in Spain and 71.2% (+8.8%) in Portugal.

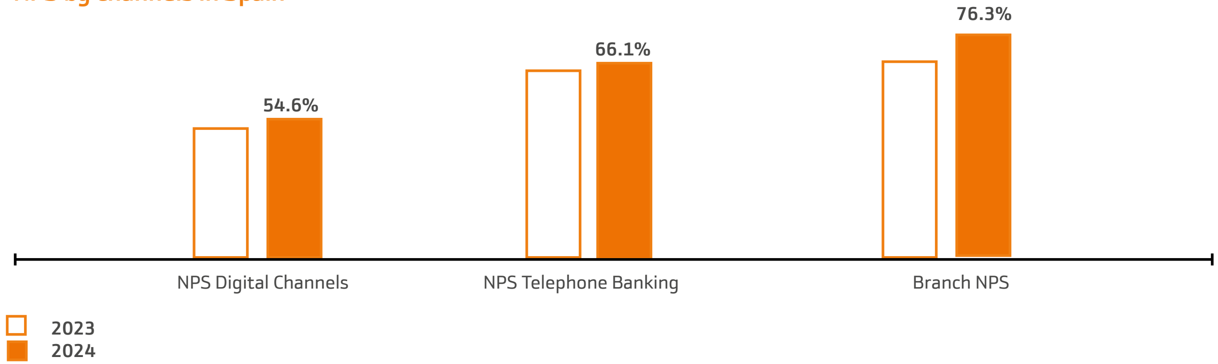
Telephone banking and branch network also maintained high recommendation levels.

NPS Bankinter aggregate (Spain and Portugal)

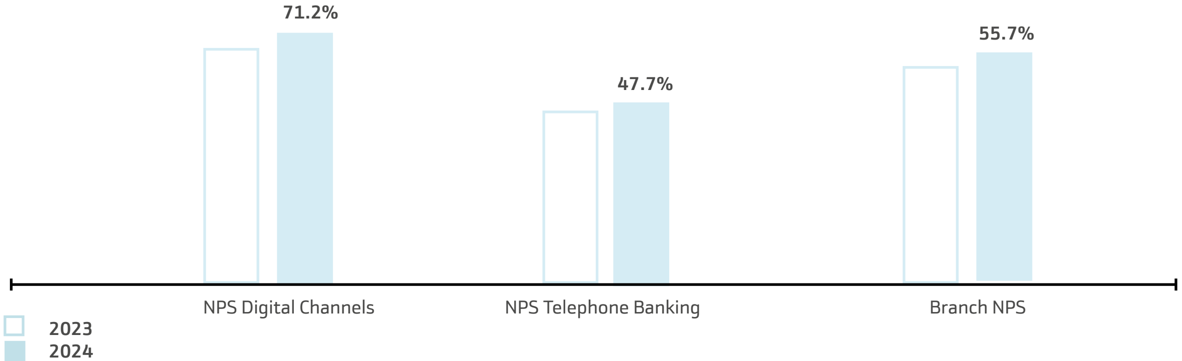


*Data reported for Portugal in 2022 have been updated due to standardisation and integration processes.

NPS by channels in Spain



NPS by channels in Portugal



Digital Banking

In 2024, in Spain, 48 of the bank's website and app processes were assessed (23% more than in 2023), providing information on the design, usability and functionality of these digital assets. This provided technical teams with daily information on customers' perception, reasons for dissatisfaction and suggestions for improvement of these processes.

The opinions of users of the platforms and websites continued to improve, with the aggregate NPS standing at 54.6% (+2.8%).

With regard to the transformation of internal processes, 29 processes were measured in real time in Spain.

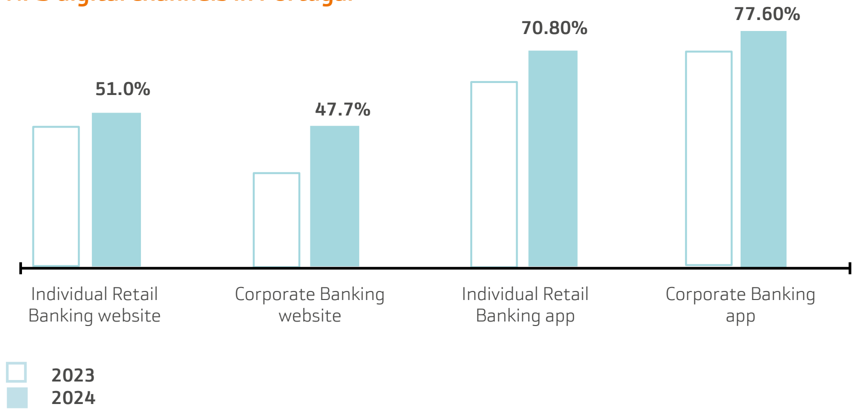
NPS digital channels in Portugal



Internal quality

The bank's Central Services have collaborated closely with the branch network with the shared aim of providing customers with excellent service. All the teams support the staff in our branch networks with the maximum agility of the processes, and in support, training and information, improving the results of the quality indicators for the areas involved. The information provided by internal surveys is the basis on which Central Services have designed their continuous improvement plans.

In 2024, in Spain and Portugal, 87 internal quality measurements were carried out, which provided a very high volume of opinions and suggestions, all of which were key to the definition of more than 345 initiatives that have been implemented to improve processes and their digitalisation, as well as to offer internal customers a service in line with their expectations.

The level of satisfaction with Central Services in Spain had a satisfactory result in 2024. The NSS (Net Satisfaction Index) was 56.0 (-2.8%).

At Bankinter Portugal, the overall satisfaction level was 41.9%, the second best result obtained to date. In addition, all Services received a positive score, with 71% showing an increase in their ratings compared to the last survey.

A series of action plans will continue to be rolled out and managed during 2025 with the aim of streamlining and boosting the digitalisation processes, simplifying processes and increasing efficiency in all areas. The bank will also continue to roll out specific actions to promote a culture of closeness, improve teamwork and co-operation between departments, streamline and improve internal communication and response capacity, always with the strategic objective of providing support to the business on an ongoing basis.

Leaders in objective quality in the branch network

For yet another year, Bankinter has remained one of the leading entities in Spain in 2024 in Objective Quality in banking commercial networks according to the EQUOS RCB-2024 study, which was carried out by an independent company.

This study assesses a series of indicators of the objective quality offered in commercial services to potential customers of the branch network for the main Spanish financial institutions using the *mystery shopping* technique (pseudo-purchases).

Bankinter has stood out in many aspects, such as customer service, the time it devotes to each visit or the explanation of its different products.

The valuation of Bankinter Portugal remains well above the sector average in 2024.

Marketing

Coherence, consistency and innovation

In 2024, the Marketing area continued with the line of communication started four years ago, based on the brand positioning "The bank that sees money the way you see it." The campaigns targeted the microeconomic aspects of individuals and companies, tackling their everyday challenges and showcasing how Bankinter can provide the suitable solutions with its financial services and products. New advertising campaigns and marketing actions were launched to reinforce the brand image and present new products and services to customers and potential customers.

All of this contributed to significantly increasing customer acquisition and achieving the demanding commercial objectives for 2024. This work earned market recognition and Bankinter received several awards for its advertising and commercial communication campaigns.

Some of the most notable ones were:

- **Effectiveness Award for the Best Existing Product Campaign** (bronze category), which values good commercial performance, as well as the consistency and effectiveness of the Bank's advertising strategy.

- **Control Award 2024,** which recognises Bankinter for the best advertising campaigns in Spain.

- The **express recognition from Interbrand** for the contribution of the advertising universe created by Bankinter to the brand's valuation, which is once again among the best in Spain.

The results demonstrate that Bankinter has been able to connect with its target audience and differentiate itself from its competitors thanks to a coherent and consistent marketing strategy. An innovative strategy in the banking sector and in a broader advertising landscape. But, above all, one that has proven to be very effective and which has allowed the Bank to become a benchmark in terms of brand awareness, image and business.

Among the most notable marketing actions of 2024 are:

- ***Online* and in-person events,** and new commercial support materials for new products or services launched and recruitment kits that present the Bank's products and services at a glance.

- **Communication actions, *online* events,** meetings with business owners, content and strategic meetings aimed at companies of all sizes to help them secure access to European funds and promote sustainability.

- **Specific advertising campaigns for the Wealth Management, Corporate & SME Banking and Partner Banking areas**, launched during the first half of the year; and the multimedia campaign "Bus" launched in the second half, which uses a humorous tone and focuses on the importance of the economy by understanding and catering to people's needs and not the other way around. Bankinter focuses on the smallest of details, innovating and improving its product for any type of customer. All to continue strengthening the bank's position as the "bank that sees money the way you do".

- **Learning more about current and potential customer behaviour,** establishing the basis for measuring their behaviour and maximise the efficiency of new digital assets, while working on new tools to enhance the customisation of web content and optimise messages and tools.

Risk management

Another year of prudent growth

In 2024, Bankinter continued on its path of prudent growth, which seeks to balance growth, profitability and risk at all times within the principles expressed in its Risk Appetite Framework.

After a more uncertain 2023, global economic growth showed signs of stabilisation in 2024. Inflation began to decline in several major economies, improving economic prospects. Financial markets have shown resilience in the face of volatility, thanks to the strength of financial institutions and investor confidence.

In this context, the Spanish economy experienced robust GDP growth, above the Eurozone average, thanks to the dynamic performance of domestic consumption and investment. Home prices continued their upward trend, driven by robust demand and limited supply.

For its part, Bankinter remained on its path of prudent growth in 2024, which seeks to balance growth, profitability and risk at all times within the principles expressed in its Risk Appetite Framework. Activity improved at Bankinter Spain, remained stable in Portugal and Ireland, moderated at EVO Banco and decreased at Bankinter Consumer Finance.

The outlook for 2025 in Spain points to a slight slowdown in growth, which will be supported by domestic demand, particularly private consumption, favoured by a positive trend in disposable income, employment and household confidence. We are also expecting to see a modest growth in productive investment and a slowdown in public spending. The trends in inflation, which is expected to remain at moderate levels, is more uncertain, mainly due to the international risks of trade fragmentation and geopolitical tensions. If inflation were to resist further declines, this would lead to monetary policy tensions and a possible deterioration of the cycle, resulting in a slowdown in credit facilities granted and a reduction in the repayment capacity of the most vulnerable debtors and corporates. Bankinter is well prepared to face these scenarios.

Moderate profile

Bankinter maintains its risk appetite principles and levels and a prudent risk profile, the management of which is one of the central pillars of its competitive strategy. The bank has a risk management model of proven effectiveness that is in line with regulatory standards and best international practices, in proportion to the scale and complexity of its business activities.

The Board of Directors is ultimately responsible for risk management. It approves the Bank's strategy and, in particular, defines the risk appetite framework. The risk appetite framework is an internal governance document that defines:

- The type and levels of the risks that the Group considers reasonable to take on in performing its business strategy.
- A set of metrics and key indicators to monitor and manage risks. These cover different variables, such as risk levels and costs, returns, loan-to-deposit ratio and capital, among other variables. For each metric, a tolerance and a limit are established, which if reached, activate corrective measures.

The Risk Appetite Framework sets out the criteria for the Group's strategy, which remain stable over the years:

Risk appetite statement. Bankinter carries out its activity with a moderate and prudent risk profile. The aim is to have a stable balance sheet and a recurrent and healthy income statement, to maximise the bank's long-term value.

Risk management principles. The Group's appetite and tolerance for risk in its activities are subject to the following principles:

- **Strategies, policies, organisation and management systems are prudent** and well-suited to the size, environment and complexity of the Bank's activities, based on high-quality banking practices.
- **Respect for and conformance to established regulatory requirements, limits and restrictions,** and ongoing compliance with prevailing legislation. In addition, principles of anticipation of new regulatory developments are applied to reduce their potential impact.
- **Maintenance a low or moderate credit-risk exposure,** in line with the values shown by the lowest NPL ratio in Spain's financial system and the lowest expected losses under stress scenarios.
- **Working with first-class financial institutions in every country, of** recognised standing and solvency and the minimum *rating* required to limit counterparty risks.
- **Proper hedging of problem assets.**
- **Suitable remuneration of invested capital.** The aim is to ensure a minimal return above the risk-free rate over the cycle, to meet capital levels at all times and to operate profitably.
- **Maintenance of a low level of market risk in the trading book**, so that in stress scenarios the losses generated have a significantly reduced impact on the Group's income statement.
- **An ALCO portfolio comprising low-risk securities (mainly government bonds) and a return** commensurate with the bank's RoE requirements designed to reduce the volatility of net interest margins and adjust the impact of any changes in interest rates.
- **Intense growth in the priority strategic medium-sized and large enterprise segments,** characterised by higher-quality risk and its notable contribution to earnings through the generation of income, fees and other recurring income.
- **Balanced loan book** to boost profitability.

"The Risk Appetite Framework sets out the criteria for the Group's strategy, which remain stable over the years.

- **Reduction of dependence on retail markets,** supported by stable growth of retail funds.

- **Diversification of wholesale funding sources,** from a standpoint of instruments and markets, maintaining a balanced maturity profile.

- **Optimisation of retail financing costs,** maintaining a balance between returns on loans and market interest rates, ensuring it stability and avoiding excessive concentration of maturities.

- **Use of a risk diversification principle** to avoid excessive concentration levels that could result in difficulties for the bank.

- **Contribution to the sustainable development of society**, including the preservation of environmental resources.

- **Limitation of business in sensitive sectors** that could entail a risk for Bankinter's sustainability or have a negative impact on its reputation and/or honour.

- **Moderate appetite for interest rate risk**.

- **Maintenance of a scaled-back structural FX position** that is as close to zero as possible at all times.

- **Strengthening control of the bank's reputation** (good corporate governance, systemic risks, etc.).

- **Lower exposure to the risk of pension commitments,** through the most appropriate mitigation procedures (outsourcing, hedging instruments, diversification).

- **Willingness to round out the level of services** Bankinter offers its Private Banking and Corporate Banking customers with limited-risk investment banking services.

- **Optimisation of the cost-to-income ratio**.

- **Maximisation of shareholder value creation** throughout the cycle, underpinned by a robust base of capital and loan-to-deposit ratio.

- **Diversification of lines of activity**. The bank takes advantage of opportunities in companies in the financial sector that are related to or complement its main business model.

- **Maintaining a** *Common Equity Tier 1* (CET1) ratio within the fluctuation band set by the bank, which is stricter than the regulatory minimum, with a medium-term target of around 12%.

Credit risk

Keeping the level of non-performing loans low

Credit risk indicators remained at low levels throughout 2024. Thus, loans and advances to customers at amortised cost grew by 3.86% and the computable risk (which includes signature risks) by 3.82%. The risk under special surveillance was reduced by 4.06% in a more benign economic context during the year. Non-performing exposure increased by 3.92% and the non-performing loan rate stood at 2.11%, the same as the previous year. The non-performing loan rate in Spain is 71% of the sector average (3.38% according to data from the Banco de España from November 2024).

Provisions for credit risk increased by 10.59%. At the end of December 2024, the portfolio of foreclosed assets was 61 million euros, 0.1% of the total credit risk, after having decreased by 28.24% during the year.

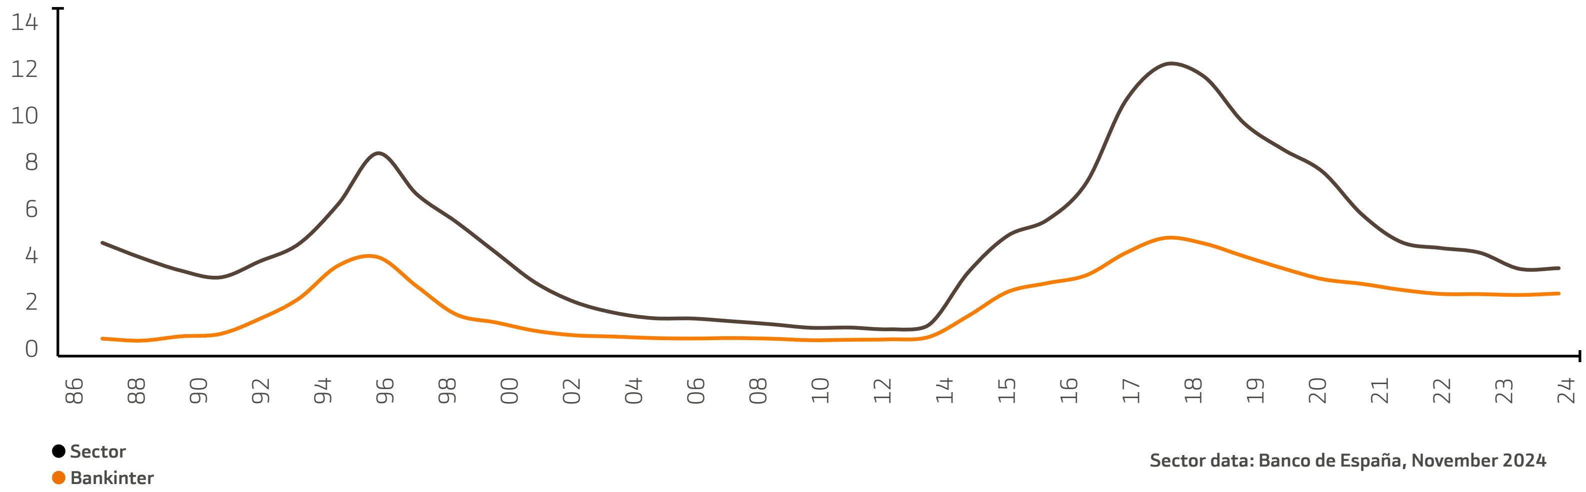
Trends in the NPL ratio (%) – Spain



Sector data: Banco de España, November 2024

Following is a description of the trends and main figures for eligible exposures in Spain by internal business segments:

Individuals. In 2024, customer credit in Spain grew by 3.8%. The portfolio at year-end stood at 38.007 billion euros, with a NPL ratio of 1.50%.

The residential mortgage portfolio of individuals recorded a *Loan-To-Value* ratio of 49.9%, where 84% of these loans had the first homes of these individuals as collateral. The non-performing loan rate for this portfolio was 1.22%. The average effort (measured as the proportion of income that the customer allocates to paying mortgage loan instalments) remained extremely low (25.3%). Bankinter Consumer Finance earned 3.3 billion euros in consumer credit in Spain, with a growth of 2.7%, which represents a slowdown compared to the previous year, as well as a non-performing loan ratio of 6.4%. The risk-adjusted margin and the default rates and costs remain controlled and in line with what is typical for this type of business.

Corporate Banking. Credit risk in the Large-corporate Banking area grew by 4.7%, reaching a volume of 21.4 billion euros, with a NPL ratio of 0.64%. In 2024, Bankinter continued to prioritise its growth in this segment, which is more resilient in adverse economic circumstances.

Small and medium-sized enterprises. The SME Banking (small and medium-size enterprises) segment grew by 4.0%, ending the year with a loan book of 16.6 billion euros and a NPL ratio of 6.32%.

EVO Banco. The subsidiary, which focuses its banking business on individuals, contributed an additional 3.8 billion euros in credit risk to the Group in Spain (13.2% more than in the previous year), with an NPL ratio of 0.55% at year end.

Portugal. Bankinter Portugal's loan book contributed 10.8 billion euros of exposures to the balance sheet at year-end, an increase of 8.9% in the year, and a NPL ratio of 1.32%.

Ireland. Customer credit activity in Ireland is carried out through the subsidiary Avant Money Plc, part of Bankinter Consumer Finance. By the end of the reporting period, Avant Money held 3.9 billion euros in credit risk, of which 2.8 billion euros were in residential mortgages and 1.1 billion euros in consumer finance. Avant Money's growth in the year was 27.3%, with a non-performing loan ratio of 1.17%. The emphasis on mortgage activity gives the business a very moderate risk profile.

Structural and market risks

Central banks are starting the process of lowering interest rates

In 2024, the risks associated with high inflation abated, leading to a shift in the monetary policy of central banks, with interest rate cuts in Europe and the United States. In the case of the European Central Bank, the official interest rates closed at 3% in 2024 from its maximum of 4% during the period, expectations still set at seeing the same trend in 2025.

With regard to equity markets, the investment concentration process continues to increase in certain companies, many of them operating in the US technology industry, which resulted in an increase in the risk of a potential correction in markets, given the high valuation accumulated in these stocks.

Furthermore, geopolitical risk continued the upward trend seen in recent years as the sources of tension increased. Maintaining high standards of prudence will continue to be essential.

Structural interest rate risk

Bankinter actively manages its structural interest rate risk (defined as exposure to changes in market interest rates resulting from the different time structures of maturities and repricing of items on the global balance sheet) to protect the bank's net interest margin and preserve its economic value.

The exposure of net interest income to different scenarios of interest rate changes is assessed monthly using dynamic simulation measures. With a more long-term outlook, the Bank also analyses the sensitivity of economic value to movements in interest rates.

Net interest margin exposure to market interest rate risk associated with changes of ±100 parallel basis points is +2.7% for rising rates and -3.5% for falling rates, both for a 12-month horizon. The sensitivity of economic value to parallel shifts of ±100 basis points stood at +2.5%/-2.7%, respectively, of Shareholders' Equity at year-end 2024.

Structural liquidity risk

This risk is associated with the bank's ability to meet its acquired payment obligations and finance its investment activity. The bank actively monitors liquidity and its projections, as well as the actions to be taken in normal or exceptional situations, whether caused by internal reasons or by market behaviour.

The instruments used to control liquidity risk include monitoring changes in the liquidity gap or liquidity plane and looking at specific information and analysis of balances resulting from trading operations, wholesale maturities, interbank assets and liabilities, and other sources of funding. These analyses are carried out under normal conditions and simulating different scenarios of liquidity needs that could arise from different business conditions or variations in the markets. Bankinter's liquidity management includes monitoring of short-term (the liquidity coverage ratio or LCR) and long-term (net stable funding ratio or NSFR) regulatory ratios.

In 2024, customer funds increased by 3.4 billion euros, driven by all business areas. As a result, the average of retail deposits continued to be considerably higher than customer credit, with the ratio of customer funds to credit standing at 105.6%. The liquidity position at the end of 2024 allowed reaching an LCR level of 199.61%, well above both internal and regulatory limits.

The NSFR liquidity ratio (Net Stable Funding Ratio), which measures the proportion of long-term assets that are covered with stable financing, closed the year at 142.7%, exceeding the ratio of 141.0% in the previous year. The Bank's financing structure, with a significant and increasing weight of customer deposits and wholesale funding focused on the medium/long term, has driven a steady increase in this indicator.

Regarding wholesale funding, a senior issue of 500 million euros matured in March 2024. In March, subordinated debentures worth 200 million euros were issued and in September a senior bond worth 750 million was issued. During the year, 1.3 billion euros matured from the liquidity auction of the European Central Bank's TLTRO (Targeted Long Term Refinancing Operations) programme.

Market risk

Bankinter measures market risk (the possibility of losses as a result of changes in the market prices of on- and off-balance sheet trading book positions) using the historical value at risk (VaR) methodology with data for one year and a 95% confidence interval.

An asset portfolio's VaR is the estimated maximum potential loss that could be incurred for a specific time horizon with a particular confidence interval. Given the stable profile in terms of positions and volatility, no changes have been made to the VaR limits compared to previous periods.

The following table sets out the VaR values of *trading* positions at the close of 2024.

On the other hand, the Value at Risk of the subsidiary Bankinter Luxembourg is monitored monthly for the positions in its financial assets at fair value, through the historical simulation methodology. The VaR of this portfolio at the end of the year was 0.08 million euros.

2024 VaR *trading*

Millions of Euros	Last
VaR interest rate	0.80
VaR – Equity	0.67
VaR – Exchange rate	0.11
VaR – Volatility rate	0.59
Total VaR	1.06

Reputational risk

Prevention and proactive control

Reputational risk is the risk arising when the expectations of stakeholders (customers, shareholders, employees, investors) are not met and their reaction can adversely affect existing or new business relationships with them. Therefore, it depends on an external assessment and can arise from a wide variety of sources, derive from other risks and even from the social, economic or sector environment.

To ensure optimal management of these risks, they should be prevented, by means of identifying them and controlling them with a proactive approach, so their probability of occurrence decreases and so their impact can be mitigated. Bankinter has different tools that contribute to this goal:

- Regular measurement of the perception and expectations of its main stakeholders (internal climate, reputation and customer satisfaction surveys, analyst *ratings*, etc.)

- Monitoring and analysing mentions of the bank in the media and social networks, as well as active listening to understand market and environmental trends.

- Assessment of reputational risk before marketing a product, outsourcing a service, partnering with a third party or sponsorship.

- Reputational risk map, which includes a catalogue of 34 possible events related to products and services, conduct, finances, leadership, innovation, labour aspects, sustainability and image. Risk events are ranked based on bank performance, potential impact, social sensitivity and level of control.

- Crisis management protocol to preserve reputation and business continuity.

- Training and raising awareness among the bank's employees to strengthen the preventive culture.

- Communication to the different governing bodies.

In addition, in 2024 progress was made in the analysis of the materiality of reputational risk derived from climate risk.

Operational risk

A preventive and decentralised management model

Operational risk is linked to the possibility of suffering losses due to failures of internal processes, people or systems or due to external events (such as natural disasters), including legal risks.

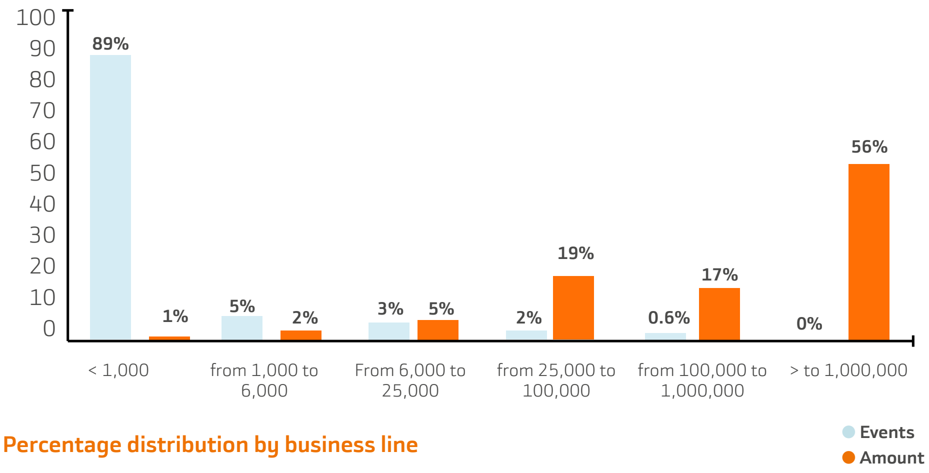
Bankinter's operational risk management model is the so-called standard method, according to current solvency regulations. Its use requires the existence of systems for identification, measurement and management of operational risks, prior authorisation from the Banco de España and an annual audit. Bankinter ensures access to best sector management practices by participating in the Spanish Operational Risk Consortium (Consorcio Español de Riesgo de Operacional), a forum of financial institutions for sharing experiences regarding operational risk management.

In order to achieve an efficient operational risk management scheme, the bank establishes the following basic principles of action:

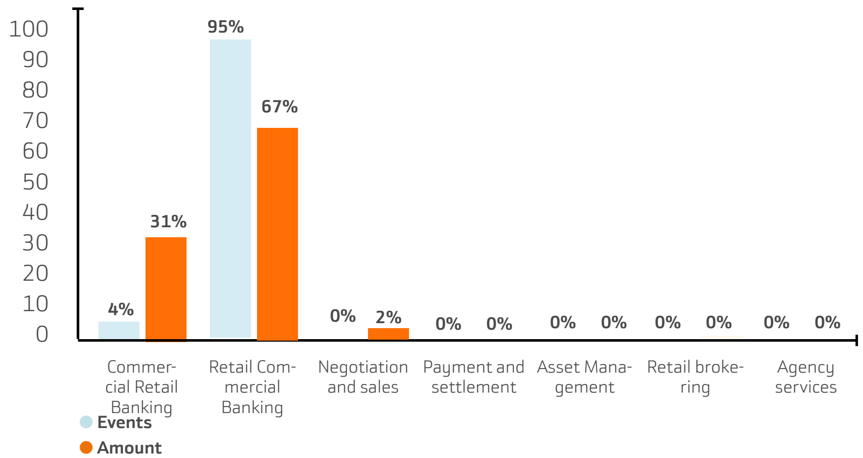
- Management aimed at preventive mitigation of the greatest operational risks.
- Decentralised operational risk management model.
- Periodic review of the situation and degree of management of operational risks in each unit.

Regarding loss events for the year, Bankinter's operational risk profile is reflected in the following graphs.

Percentage breakdown by amount intervals



Percentage distribution by business line



Furthermore, a new European Union Regulation was published in June 2024, modifying the requirements for operational risk, among others. With regard to the operational risk management framework, it is decided to replace the three existing methods for estimating capital requirements (basic, standard and advanced) with a single non-model-based method, newly designated as the standard method. These changes apply from 1 January 2025 and Bankinter has adapted its operational risk management framework to comply with the new regulatory requirements.

Insurance as a form of coverage

Bankinter uses insurance as a key element in the management of certain operational risks, thus complementing their mitigation in those cases that require it by their nature. To this end, the convenience of taking out insurance policies to cover the various operational risks is assessed on a regular basis.

More detailed information on these risks can be found in the Prudential Relevance Report, the Group's Consolidated Legal Report and the Annual Corporate Governance Report. The progress made in 2024 in the portfolio's climate risk management is explained in detail in the Non-Financial Information Statement.

Regulatory Compliance

Identification and measurement of process risks

The Bank must achieve its business objectives while complying not only with regulations, but also with the best international and national practices and standards required of its operations. For this reason, compliance constitutes for Bankinter not only a legal obligation but also an ethical commitment to society as a whole.

This commitment also serves as an opportunity for reflection for Bankinter as a leading institution adapted to the new reality of the finance industry, which is subject to the need to change relationships with customers and adjust the bank's business model to reflect new financial consumption habits and multiple reporting requirements.

The purpose of the compliance function is to advise and provide guidelines to the business lines that help define the strategy, ensuring compliance with applicable regulations at all times. With this purpose, all Regulatory Compliance areas go to great lengths to train commercial staff.

Institutional framework

The Regulatory Compliance area, which is part of the Regulatory Compliance Department, reports to the Risk and Compliance Committee of the Board of Directors and is part of Bankinter's administrative structure through the Corporate Control and Compliance Department, which supervises its activity. This area has responsibilities of a global scope, of a corporate nature and aimed at providing the necessary support to Bankinter's governing bodies.

The risk control culture is deeply rooted in the organisation. Driven by the strong involvement of the Board and Senior Management, it is transmitted to the business units with agility and efficiency through this corporate structure, the systems and tools configured from the outset to ensure compliance with the rules and prevent undesirable behaviour. This strategy is reinforced by an incentives policy consistent with the Bank's risk appetite, with continuous and mandatory training for the entire workforce, and a stronger and more effective Whistleblowing Channel.

In 2024, the risk measurement methodology in this area was applied at the corporate level and was monitored using a tool common to all areas that make up the second line of defence. Similarly, during the year, a project was developed to implement a corporate taxonomy of the bank's processes, which aims to strengthen the three-line defence model and the identification and measurement of the main process risks, as well as to strengthen the bank's governance.

Basic areas

With this institutional and regulatory framework, the bank developed in 2024 the basic Regulatory Compliance areas of the second line of defence, which is organised into the following units:

Control and advice on banking transparency and products, investment services, market abuse, Internal Code of Conduct and conflicts of interest. Responsible for risk management and for providing advice to the governing bodies on matters related to the supervision and control of compliance with rules of conduct in the provision investment, banking and insurance services, as well as on conduct in the securities market and the prevention of market abuse.

Prevention of money laundering and terrorist financing. Ensures compliance with the policies and procedures adopted by the bank in order to guarantee adequate coverage of existing risks, through the application of a risk assessment framework and the promotion of measures for their mitigation and in advising the governing bodies regarding the supervision and control of compliance with internal and external regulations in this area.

These units participate in the Regulatory Compliance Committee, the Product and Operational Risk Committee, the Internal Control Body and the Agent Acceptance Committee.

Furthermore, the Money Laundering Prevention Area is responsible for ensuring compliance with the policies and procedures adopted by the bank in the area of prevention of money laundering and terrorist financing (PBC/FT).

Preventing these practices is a strategic objective for Bankinter Group and an ethical commitment to society at large, in compliance with international standards and best practices in this area. In line with this objective, during 2024 Bankinter and its subsidiaries continued to develop the control measures required to comply with regulations and updated the risk appetite framework and map, as well as the corresponding IT tools .

Likewise, the AML/CFT Policies and Procedures Manual and all associated procedures were also amended to streamline and structure the procedures, incorporating the supervisor's proposals and taking into account regulatory changes.

Work also continued on the Action Plan approved for the year to comply with the recommendations of the external expert and the supervisory authority on this area. As a general rule, all of the Bank's employees receive mandatory training on matters related to AML every year. By the end of 2024, 8,773 participants had completed 6,749 hours of training in this field, an increase of 27% and 37%, respectively, when compared to 2023.

Regulatory agenda

Bankinter has assigned the role of identifying and reporting regulatory changes to the Regulation area, which reports to the Office of the General Secretary. As such, it facilitates the early detection of potential impacts of regulatory changes, thereby reducing their risks. In this regard, it annually prepares a three-year map that serves as a basis for defining the regulatory strategy. In addition, the regulatory changes during 2024 were managed with an end-to-end approach, participating in several projects that required the adaptation of the bank's activities or processes from the start.

The regulatory agenda in Europe was marked by the parliamentary elections in June 2024, which led to a slowdown in regulatory processing. During the year, it is worth highlighting the publication of the regulation establishing the European digital identity framework (eIDAS2). Similarly, the legislative package on the Prevention of Money Laundering and Financing of Terrorism and the regulation on immediate payments were published.

Also noteworthy are the preparatory work for the implementation of the Digital Operational Resilience Regulation (DORA), which will strengthen the security framework for the financial sector, as well as for the Corporate Sustainability Reporting Directive (CSRD), which will entail an increase in the information to be reported on this matter from 2025.

"During the year, it is worth highlighting the publication of the regulation establishing the European digital identity framework (eIDAS2).

At the national level, the Spanish legislator and supervisors focused on the protection of retail consumers and investors. The following projects stand out:

- Law 11/2023, which transposes Directive (EU) 2019/882. The project aims to ensure the accessibility of banking products and services for people with disabilities.

- Proposal for the creation of the Independent Administrative Authority for Financial Customer Protection, which will replace the current customer service departments of Banco de España, the CNMV and the General Department of Insurance.

- Effective transposition of Directive 2023/2225 on Consumer Credit Contracts. This regulation is expanded to include protected products in its scope and strengthens the protection measures for customers who apply for credit.

The success of these projects is crucial not only to meet regulatory requirements and mitigate reputational risks, but also to maintain the trust of customers and supervisors.

Outlook

Three major areas of work are anticipated on the regulatory horizon. The first priority for legislators is sustainable finance. The most relevant milestone will be the transposition of the Corporate Sustainability Reporting Directive (CSRD) into the Spanish legal system.

A second point of focus is the Capital Markets Union. In this context, the two most important refer to the regulatory packages of the Retail Investment Strategy (MiFID III) and the compensation package (Clearing Act). These are highly significant initiatives because they have the potential to significantly transform the business model and internal processes. For this reason, its progress is monitored to anticipate its impact and repercussions in the coming years.

The third focus will be digital finance. In this area, it is also worth noting the implementation of the retail payments and data access package (PSD3, PSR and FIDA). It aims to improve internal processes to reduce fraud and foster innovation in the financial sector by allowing consumers and SMEs to authorise third parties to access and use their financial data, similar to the information-sharing provisions of open banking under PSD2.

A joint analysis of the announced initiatives shows that the legislators are firmly committed to strengthening customer protection, ensuring financial stability and improving the competitiveness of European financial markets in a sustainable manner.

Digital Security

Protect to strengthen the stability and boost the business

Digital security is one of Bankinter's top priorities, as demonstrated year after year by the increase in budget and staff dedicated to this area. The purpose is to ensure a high level of confidentiality, integrity and availability to customers, employees, shareholders and suppliers, in accordance with the objectives described in the following image.

Achieving these objectives translates into a clear return on investment. By preventing costly incidents and complying with regulations, the bank avoids sanctions and financial losses that could reach millions of euros, reinforcing its stability and sustainability. Therefore, the Digital Security team at Bankinter not only protects its customers and the business. It also drives business and ensures an environment of trust. Digital security is a true *business driver* that contributes to the Bank's mission of offering quality financial services

These commitments are set out in the Digital Security Master Plan, which made important contributions to security projects and internal processes in its third year in force.

These include increased maturity in business continuity plans and protection against threats such as distributed denial of service attacks (DDoS) and ransomware.

The use of the NIST Cybersecurity Framework (a framework for protection against threats and risks) makes it possible to measure the level of maturity of compensatory controls or countermeasures and minimise risk to the bank. In 2024, a high level of maturity was reached and for 2025 a much broader, more ambitious and demanding global framework has been proposed.

In addition, BSI's certifications in Security Management (ISO 27001) and Business Continuity (ISO 22301) were renewed in 2024, providing external assurance in project implementation and process development.

Security reviews were also conducted on the Bank's suppliers, using a methodology based on the European Banking Authority (EBA) guidelines.

In turn, a team was appointed to address the application of the European DORA regulation, which ensured its early compliance and guaranteed that all Bankinter Group subsidiaries are covered in terms of digital resilience.

Raising awareness on matters related to cybersecurity

In the world of cybersecurity, compensatory measures for detection, prevention, protection and recovery have been deployed. At the same time, maturity in the management of identities, passwords, additional authentication methods, etc. was improved.

The area's activity included the development of awareness-raising plans for users, who are the weakest link in the security chain. The bank rolls out *online* training programmes for workers via the intranet and simulations are run to check how confidential information (passwords, identification data, etc.) can be unintentionally disclosed via e-mail, text messages (*smishing*), phone calls (*vishing*), etc. Some of these exercises were expanded in 2024 with the performance of *baiting* (USB) and hacking (social engineering with QR codes) exercises.

In addition, in 2024, *role play* exercises were carried out on senior management to analyse decision-making and evaluate the reaction of the management team in terms of cybersecurity using technologies such as artificial intelligence to expose the risks derived from its misuse, such as fraud, identity theft and reputational damage.

The awareness-raising work also extended to external staff, with direct initiatives for Bankinter customers and non-customers. In this sense, a specific web portal was created where you can take a course with an immersive experience, listen to podcasts, read news, books, manuals, etc.

Cyber Intelligence: anticipating problems

At the same time, Bankinter deployed a cyber intelligence service to obtain early and preventive information on threats such as stolen customer credentials, compromised credit card numbers, brand abuse, etc.

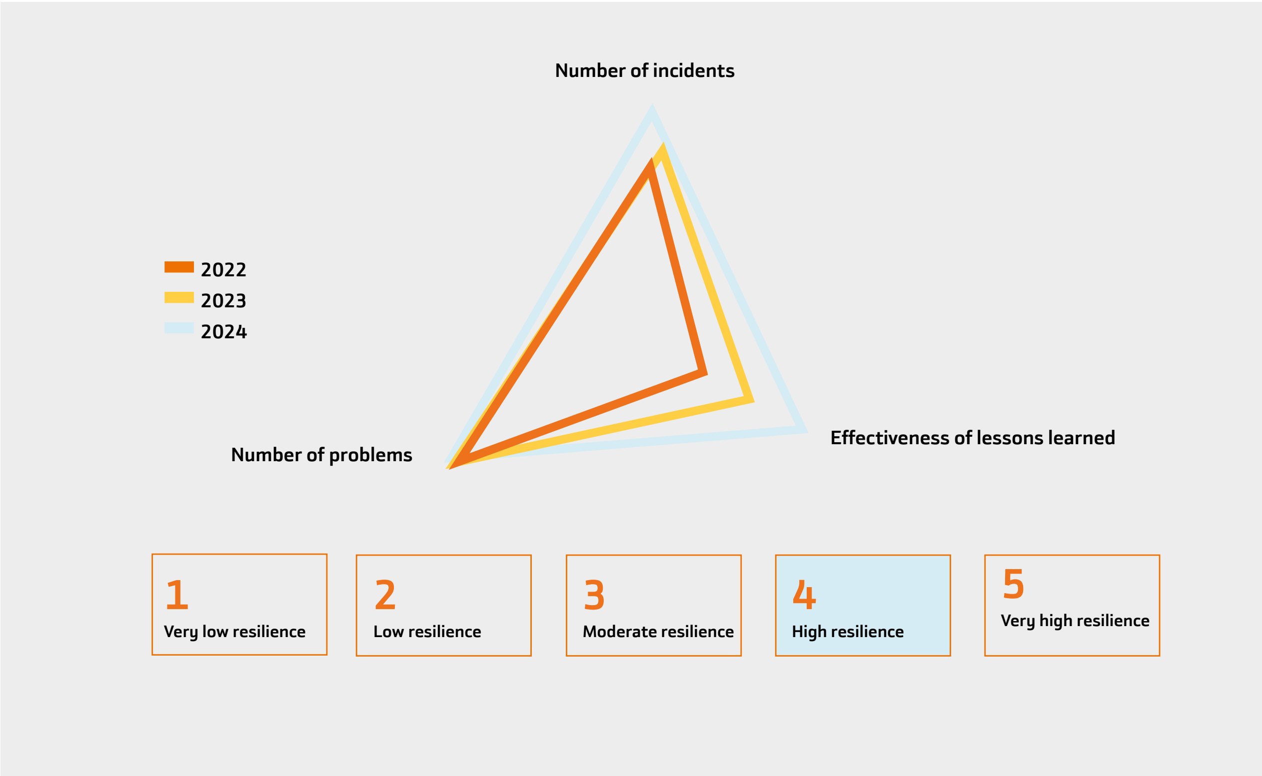
This service provides additional visibility into what is happening outside our borders, which, together with the internal information reported to management through performance and risk indicators, allows for the construction of a global picture that helps with the early and proactive management of threats and risks.

To unify all the information necessary for its correct management, the strategic project of the Modern SOC (*Security Operation Centre*) in 24x7 mode was completed.

These security operations centres are highly specialised and have expert professionals at different levels of support and analysis, which guarantees constant knowledge and an appropriate response to incidents worldwide and with a comprehensive service.

Technological Risks and Fraud

Always alert to protect the bank and its customers



The Technology Risk and Fraud Management Division was created in 2024, with the objective of assessing the bank's technological risks, preparing the business continuity plans and protecting customers through the continuous improvement of tools for preventing and detecting technological fraud.

The current context of uncertainty (armed conflict, increased and more sophisticated cyber attacks, climate change, etc.) requires Bankinter to be constantly updating the catalogue of technological threat and, as a consequence, of the associated risks. These risks are analysed from a two-fold perspective, including outsourcing and internal initiatives that help achieve the Bank's objectives.

In this regard, the main achievements of 2024 were the improvement in ICT risk indicators, the centralisation of the management of major events and incidents, and the development of the ICT Risk Framework, including Bankinter's operational resilience strategy to achieve a high level of resilience, in accordance with the monitoring criteria set forth by the regulation.

The objective for 2025 is to implement the system availability testing plan, so that the lessons learned can drive continuous improvement. Along these lines and also in relation to improving the level of operational resilience, the focus will be on the global vision of suppliers' third-party risk and the improvement in the continuous monitoring of critical technology suppliers.

Fraud

Scammers' methods are constantly changing to deceive their potential victims, which is why an increasingly sophisticated technological ecosystem is required to improve the bank's preventive capacity and response agility.

In 2024, Bankinter defined and launched a new Fraud Risk Management Master Plan, which sets out the strategy and objectives for fraud control for the next two years. The plan focuses on increasing the institution's level of maturity, with the deployment of projects that pursue the development of innovative technological capabilities, efficiency, scalability and global vision, as well as proximity to business and customers.

Improving the experience of potential victims has always been a top priority. In line with this, the Fraud Assistance Service (FAS) was created last year, which operates twenty-four hours a day, seven days a week. It is managed by expert staff who provides a direct line of communication between the customer and the bank for any issues related to possible scams and/or fraud.

In 2025, the challenge remains to put the customer at the centre of the Master Plan, approaching customers' needs from different points of view:

- Optimise the way in which we discriminate between fraudulent and legitimate customer transactions. Reduce the ratios of false positives.
- Automate fraud or scam reporting processes so that affected customers can file a complaint and even receive a refund without having to visit a branch or interact with a real person.
- Help customers address their financial and emotional distress at a time that may undermine their confidence in the bank's ability to protect their money.
- Continue to raise customer awareness, keeping them informed about the most common methods used by scammers and offering advice on how to stay protected.

Innovation

> Digital Banking
> Bankinter Innovation Foundation

Digital Banking

Technology at the service of customers

Bankinter continued to improve its capabilities throughout 2024 with a view of offering a better and more agile service to its customers. The initiatives rolled out to achieve this objective were articulated through different strategic fronts, such as the transformation of the service through digitalisation, process re-engineering and optimisation, the modernisation of applications and technological infrastructures or maximisation of the value extracted from data through information management and artificial intelligence.

Priority on digital channels

One of the bank's priorities is the continuous improvement of its digital channels, including websites and apps for individuals, companies and brokers, to offer a more agile and convenient experience to its customers. To this end, new services and improvements were launched across all channels. It is worth highlighting the new Broker website, which offers completely renewed usability to provide an experience in line with the needs and demands of customers.

Beyond the channels themselves and their general capabilities, digital utilities and products were incorporated. For example, the use of virtual cards was extended to all customers, incorporating innovations such as use through payment wallets of the main brands, allowing for a more agile and secure experience.

Process improvement

In 2024, the mortgage arrangement process was streamlined and improved to help customers interact with the bank through different channels (and using any combination of them). At the same time, new visual comparison tools are provided between Bankinter products and enriched information on the behaviour of the mortgage in different scenarios. In parallel, a first phase of internal optimisation of mortgage production processes was completed. From the customer's point of view, the improvement translates into greater service agility in the authorisation, processing and signing steps. Behind closed doors, this means achieving a higher cost-to-income ratio through automation and a wealth of information for decision-making.

Other processes with an impact on customers with significant improvements in 2024 were those related to the transfer of positions (funds, securities, plans, etc.), supported by entity aggregation or the remote signing of documents. In addition to the above improvements, a document management transformation programme was completed during the year to optimise the storage and flow of documents between different processes and applications, including improvements in categorisation, access, visualisation and reuse. The use of artificial intelligence techniques to classify and extract data made it possible to automate a very large part of the entire processing cycle. From the customer's point of view, it provides a more agile interaction with the Bank and minimises the need to exchange documents.

Data management and artificial intelligence

Data management is key to maintaining compliance standards and achieving the highest competitiveness in service delivery. Bankinter worked in collaboration with various partners to modernise data processing through cloud infrastructure projects that allow for greater agility and scalability of service. These advances are essential to support functional initiatives to extract value from data.

The data analysis capabilities were improved in 2024 by working hand-in-hand with leading suppliers and incorporating new tools. The result of these improvements is streamlined data-related research and an increased ability to translate them into use cases relevant to the customer and to maintain them in optimal operating conditions over time.

Early generative AI initiatives began to produce results in parallel with the production of conventional AI use cases. A series of applications were also rolled out with the aim of boosting the productivity levels, both in the central services and across the sales network. Specific productivity tools were also created for programmers in order to reduce software engineering times . Several initiatives were completed in 2024, from self-service chatbots to automatic document reading tools and other tools to automate associated procedures, all aimed at boosting agility and efficiency and serve as a signal to roll out these techniques to new uses and processes.

In addition, in terms of customer relations, AI-based tools were also rolled out, such as for checking the information and managing receipts with a natural language from the personal banking website or enriched information in the fund search engine.

Bankinter Innovation Foundation

Initiatives with a tangible impact on society

The Bankinter Innovation Foundation continued working in 2024 to transform society through innovation and development, via initiatives that generate a tangible impact in multiple sectors.

The new *InspiraTech* programme marked an important milestone in last year's activity. Developed in collaboration with the CSIC General Foundation, its main objective is to help researchers transform their knowledge into real solutions applicable to the market.

The Cre100do Foundation, which continues to receive the support of the Bankinter Innovation Foundation as its ex officio trustee, celebrated its tenth anniversary, consolidating its mission to drive the growth of the Spanish *middle market*.

The Bankinter Innovation Foundation's *think tank* invited international experts to the *Future Trends Forum*, who participated in two of the main events. In addition, key reports were published, such as the third Megatrends Report, the quantum computing guide for enterprises and the report of the smart agriculture forum held at the end of 2023.

The Akademia programme continued to bring innovation and technology to Spain's most talented university students. The programme rolled out for the second half of 2024 hit a historic record registration figure. One of the new features of the programme was the real challenges posed to students by the companies participating in the Cre100do programme. The face-to-face activity was increased with practical sessions organised at universities, bringing the academic world even closer to the professional world.

The Foundation's commitment to the entrepreneurial ecosystem remained firm through the *Startups* and Scaleup Spain Network programmes. The *Startups* Observatory reached a turning point in the investment market, showing a slight recovery after the downward trends of recent years. 12 new *startups* joined the network of the Scaleup Spain Network in its fifth year, reaching 62 companies that have received funding worth 1 billion euros to date.

Board of trustees

The Board of trustees of the Bankinter Innovation Foundation gathers a Group of leaders, experts and international benchmarks in the field of innovation, from the business, academic and scientific fields. Their knowledge and experience provide a fundamental strategic vision that guides the Foundation's activity and its impact on society.

In 2024, the former Chairman, José María Fernández Sousa, and the Patron, Stephen Trachtenberg, key figures in the development and consolidation of the Foundation for years, decided to discontinue their collaboration with the Foundation to focus on other projects. Juan Antonio Zufiria became the new Patron and Chairman of the Foundation, bringing a solid track record in innovation and technology.

Composition

The Board of Trustees is made up of the following highly prestigious professionals from various disciplines and countries, whose experience and leadership enrich the work of the Foundation:

- Juan Antonio Zufiria (Spain) – Chairman
- María Dolores Dancausa (Spain)
- Pedro Guerrero (Spain)
- John de Zulueta (Spain)
- Rafael Mateu de Ros (Spain)
- Ángel Cabrera (United States)
- Antonio Damasio (Portugal)
- Dongmin Chen (China)
- Charles Bolden (United States)
- Emilio Mendez (Spain)
- Carlos Mira (Spain)
- Gloria Ortiz (Spain)
- Philip Lader (United States)
- Richard Kivel (United States)
- Eden Shochat (Israel)
- Jens SchulteBockum (Germany)
- Soumitra Dutta (India)
- Tan Chi Nam (Singapore)
- Wilfried Vanhonacker (China)
- Sheila Stamps (United States)
- Grace Xin Ge (China)
- Scott Simon (United States)

The diversity of the Board of Trustees, both in terms of its profiles and international origins, guarantees a global and strategic vision that drives the development of the Foundation's programmes. The Board of Trustees, as the central body, continues to be an essential pillar guiding the activity and impact of the Bankinter Innovation Foundation on society.

"Future Trends Forum"

With more than 800 internationally renowned experts and a proven track record with over 43 successful editions, the Foundation's *think tank* remains a unique platform for anticipating global challenges and offering a strategic vision to participants.

Forums held

- Water: our vital resource in jeopardy (June). Thirty-six international experts analysed how climate change, population growth and resource scarcity require innovative and resilient solutions. Some of the most important proposals include desalination technologies, water recycling, digitalisation of water management systems and the exploration of alternatives, such as atmospheric water capture methods.

- Embodied AI: Embodied Artificial Intelligence (December). Twenty-four experts participated, exploring the latest advances in physical AI, its applications in key sectors and the ethical and social implications of this emerging technology. The forum's analysis highlighted the opportunities of AI for the transformation of industries, such as healthcare, logistics or manufacturing, and its challenges in terms of security, regulations and ethical responsibility.

Reference reports

- Megatrends (March). The third Megatrends report identifies and analyses the innovations with the greatest potential for impact in the near future.

- Smart agriculture: The challenge of sustainable food and farming (April). This report was drafted with the conclusions of the 2023 forum, focusing on how technology is transforming agriculture and food, offering solutions to ensure a more sustainable and efficient food system.

- Quantum computing roadmap for companies (September). Developed in collaboration with two of the experts from the "*Future Trends Forum*", it offers a practical guide for companies, helping them understand and adopt quantum technologies.

- Water: Our vital resource in jeopardy (October). From the June 2024 forum onwards, it will delve deeper into the innovative solutions needed to guarantee water sustainability in a context that is increasingly affected by the impact of climate change.

In addition to the forums and reports, the "*Future Trends Forum*" expanded its scope in 2024 by holding 15 webinars, reaching over 10,000 viewers, on the latest topics, such as neurotechnology, AI, smart agriculture and water management. High public interest and satisfaction are reflected in an NPS of 74.5.

Akademia

In the first call for applications for the 2024-2025 academic year, Akademia reached a historic participation record, with 159 students. The call for applications for the previous academic year, for its part, closed with an NPS of 84 and a recommendation rate of 100%, thus consolidating the excellent reputation among participants.

One of the main new features of last year's programme was the replacement of the traditional practical case with a real challenge posed by a company, as part of the Cre100do programme. Students worked in teams, using what they have learnt to solve specific problems in a business environment, using innovative tools, such as the development of AI algorithms. This methodology allowed participants to face real-world situations, acquiring skills that can be used in the professional world.

In its effort to bring the programme even closer to academic and professional environments, Akademia increased face-to-face activities during the first four months of the course. Sessions were held at different universities, such as Santiago de Compostela, Loyola, Instituto de Estudios Bursátiles (IEB) and Pontificia de Comillas, where students attended practical sessions held in collaboration with other companies.

The success of Akademia would not be possible without the participation of its experts, who share their knowledge with students in each session. In 2024, there were new additions, mostly from the Akademia Talent alumni network. In this way, not only is the sustainability of the project guaranteed, but the sessions are also enriched with up-to-date perspectives and real examples of innovation and professional success.

Startups

Since its launch in 2013, the *Startups* programme has been a benchmark in supporting innovative projects, helping secure investment and helping disruptive technology companies grow. Throughout its history, it has invested in 49 *startups*, in collaboration with Bankinter Capital Riesgo, offering them not only financing facilities, but also key tools and knowledge to help them grow their businesses.

The programme ended at the end of 2024, after having achieved its initial objective of securing professional investment for *startups* during their earliest stages after inception, with the aim of driving the development of the entrepreneurial ecosystem in Spain. However, the last startup joined the programme before it was closed: MiResi, an innovative platform that facilitates access to nursing homes and home care services, simplifying an essential process for many families.

Observatory

The *Startups* Observatory, a benchmark tool used to analyse and understand the Spanish entrepreneurial ecosystem, continued to grow and establish itself as a benchmark portal of the business ecosystem information.

According to 2024 data, the total investment in *startups* exceeded 3 billion euros, showing a return to the path of growth. The average size of the funding rounds increased by 62%, reaching 9.9 million euros, mainly driven by the rise in mega-rounds (transactions worth over 50 million), which grew by 54%, with 14 large transactions signed. However, the total number of transactions dropped by 22%, down to 294, due to lower support for smaller funding rounds.

This context highlights a shift in the investment dynamics, in which the capital concentrates in larger transactions, while earlier-stage *startups* are facing more demanding environments.

Scaleup Spain Network

The fifth programme was organised and held in 2024, in collaboration with Wayra and Endeavor. The initiative, aimed at *startups* with a high growth potential, offers entrepreneurs the tools and knowledge required to make the leap towards their consolidation as *scaleups*.

The fifth programme added 13 new *startups* to its network, reaching a total of 63 participating companies since its launch. These companies represent a real driver of economic growth and job creation, accumulating 1 billion euros in financing and an average of 65 employees per company.

Key activities include:

- In-person bootcamp (October), where entrepreneurs participated in practical sessions on the definition of organisational charts, operations management and OKR methodologies.
- *Networking* sessions and workshops on core topics, such as B2B sales, talent and recruitment, *fund-raising* and international expansion.

Thanks to this network, participants gain access to a unique collaborative and learning environment, where the exchange of experiences and knowledge between entrepreneurs, mentors and experts is essential to their success.

In addition to the investment and scale-up programmes, the Foundation maintained its commitment to reaching out to the entrepreneurial ecosystem through Breakfast meetings with Entrepreneurs in 2024. Four *online* meetings were held, with a total audience of 214 viewers and an average satisfaction index (NPS) of 81.25. These events serve to bring successful experiences and lessons from the entrepreneurial ecosystem closer to a community that is increasingly interested in innovation and entrepreneurship.

InspiraTech

In 2024, the Bankinter Innovation Foundation launched *InspiraTech* in collaboration with the CSIC General Foundation, an innovative programme designed to transform scientific research into real and applicable solutions, capable of generating a tangible impact on society This programme connects the academic and scientific world with the business environment, promoting the transfer of knowledge and the creation of innovative products and services.

The programme is aimed at PhD students with at least two years of advanced experience or recent PhD graduates (less than three years since graduating), researchers at CSIC centres and laboratories and projects focusing on industrial and deep tech areas, with the potential to solve real market challenges.

The *InspiraTech* methodology combines in-person *bootcamps* and online *sessions*, ensuring a practical and applied approach. Twenty researchers were selected for this first bootcamp, who are developing projects in high-impact areas, such as artificial intelligence, quantum computing, biotechnology and energy.

Cre100do

Ten new companies joined the Cre100do community, each selected for their excellence and capacity for innovation: Lantania Group, Galenicum, Aluman Group, Matachana, Instituto Español, Making Science, Fain, Matarromera, Kaleido Ideas & Logistics and Salicru. With these new additions, the Cre100do community now has 130 companies, and is consolidating its role as a benchmark of the Spanish *middle market*, while demonstrating that ETIs are key players in the creation of wealth and jobs.

Furthermore, it also has a proven ability to generate a positive impact outside large cities. 40% of the Cre100do member companies are based in municipalities with fewer than 20,000 inhabitants, which reinforces their role in the fight against depopulation and in their commitment to create local jobs.

On the occasion of the tenth anniversary of the Cre100do Foundation, Felipe VI received some of the members who attended on behalf of the Board of Trustees at Zarzuela Palace. The Foundation's Annual Event, held on 15 November at the Mutua Madrileña auditorium in Madrid, also served to commemorate the anniversary and recognised the achievements of the last ten years of this community of excellent enterprises.

Corporate Governance

Corporate Governance

A transition to a new stage. Stability and ambition

2024 was a pivotal year, marked by the handover of the Non-Executive Chair's Office and the appointment of a new Chief Executive Officer. The process was concluded on 21 March 2024.

A succession process managed in accordance with the provisions of the Succession Policy approved by the Board of Directors has been key to ensuring an orderly transition, thus protecting and also ensuring business continuity without any setbacks, and consolidating a robust and effective governance model to face the challenges of a new stage. As demonstrated throughout the 2024 financial year, this approach has enabled Bankinter to continue to drive a unique and differentiated business model, based on profitable growth, the diversification of sources of income, an omni-channel integration approach, and effective risk control. The bank's model leverages synergies between the Group's subsidiaries and the geographies in which it operates, thereby meeting the expectations of its stakeholders.

A new stage for which the bank has designed an ambitious strategic plan for the creation of long-term value for all our different Groups of stakeholders: Our shareholders, customers, employees and society as a whole.

In addition, in 2024, the Board of Directors asked three new Independent External Directors to join the Board, with a view to strengthening the Bank's position in the face of the challenges posed by the increasingly intense regulations, digitalisation and the risks associated with technological security. The first, appointed by the General Meeting in 2024 and the other two, proposed for appointment by the General Meeting in 2025, which will imply an increase in the number of Board members to 12.

Moreover, and according to the provisions set out in its regulations, the Board of Directors appointed a Lead Director, reinstating a role it had included in the past.

Lastly, in 2024 Bankinter has adopted a new organisational structure in terms of sustainability with the aim of providing and promoting a homogeneous and transversal vision within the Bankinter Group.

Some of the new features and improvements implemented in 2024 are described in greater detail below. More detailed descriptions are provided in the Annual Corporate Governance Report, which is available on Bankinter's corporate website.

Composition of the Board of Directors

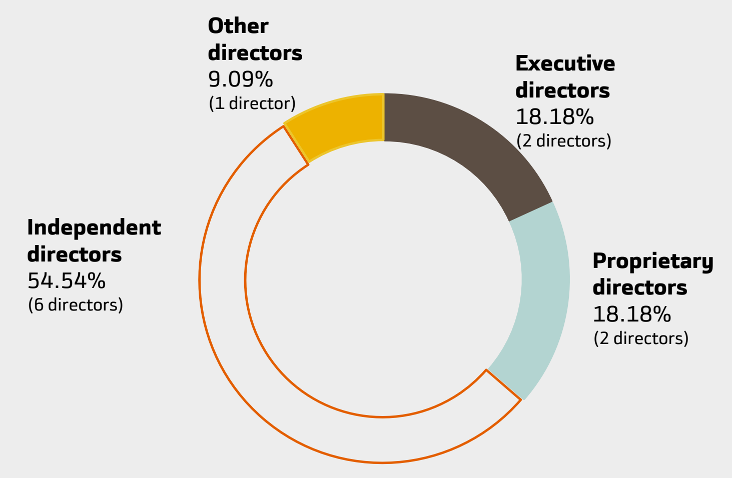
As stated above, the 2024 Annual General Meeting approved the appointment of Gloria Ortiz Portero as Executive Director of Bankinter and the appointment of a new Independent External Director, Teresa Paz-Ares Rodríguez, both for the statutory term of four years.

Furthermore, the Board of Directors held on the same date appointed María Dolores Dancausa Treviño as Non-Executive Chair of Bankinter and approved the delegation of all powers that by law and according to the bylaws are conferred to Gloria Ortiz Portero, appointing her as CEO. Likewise, it agreed to appoint a Lead Director from among its Independent External Directors, Cristina Garcia-Peri Álvarez, currently the Chair of the Audit Committee.

Consequently, the Board of Directors continues to be made up of 11 directors as of the date of issue of this Report, with the following distribution of categories:

Therefore, the Board of Directors maintains the necessary size to foster its effective performance, participation by all Directors and agility in decision-making, as well as a structure that reflects the existing proportion between the company's capital, represented by Proprietary Directors, and the rest of the capital, by having 55% of Independent Directors. In this regard, Bankinter adheres to the national and international best practices and recommendations.

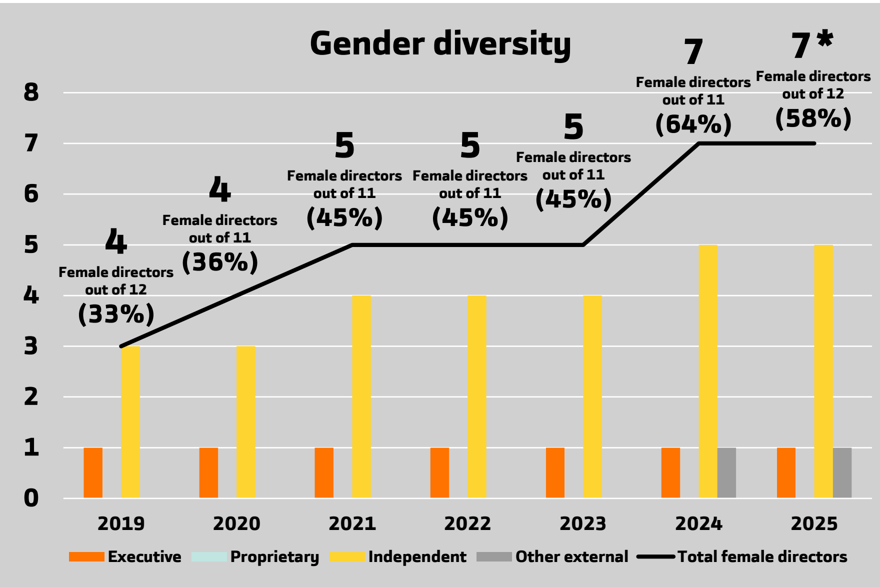
It is also worth noting that the Board of Directors, at the proposal of the Sustainability and Appointments Committee, has agreed to submit to the Annual General Meeting held in March 2025, the appointment of Alfonso Villanueva Rodríguez and Juan Antonio Zufiría Zataraín as Independent External Directors, with a view to strengthening its competencies in the field of technology.



As regards gender diversity, the percentage of women (7) within the Board is above the objectives set by both Bankinter and national and international recommendations and best practices.

In addition, Bankinter is the only company listed in the IBEX35 with two women in the Bank's main administration and management roles (Non-Executive Chair of the Board of Directors and Chief Executive Officer). The other female directors (5) are Independent External Directors.

The progress achieved on the gender diversity objectives is described below:



* Once the new appointments proposed to the General Shareholders' Meeting 2025 have been approved.

The Board of Directors as a whole has sufficient and appropriate knowledge, skills and experience to cover all areas necessary to properly understand the development of the bank's activities, including its main risks and to ensure the effective capacity of the Board of Directors to make decisions independently and autonomously for the benefit of the bank:

- The bank's operations and the main related risks, including emerging risks, such as climate, environmental or geopolitical risks.
- Each of the bank's most important activities.
- Relevant areas of sector/financial expertise, including financial and capital markets, capital adequacy and models.
- Accounting and financial reporting.
- Risk management, including emerging risks.
- Compliance and internal audit.
- Information technologies and security.
- Local and regional markets.
- Legal and regulatory environment.
- Leadership skills and management experience.
- Strategic planning capacity.

It is important to note that the collective suitability of the Board of Directors for risk management, in general, given the diversity of the risks, must be objective and related directly to its main activity. However, there are emerging risks, such as climate or geopolitical risks, which are cross-cutting in nature and, without being specific to the bank's activity, can affect multiple aspects of the business. The cross-cutting nature of these risks requires a holistic view and coordinated action by the Board as a whole.

This approach ensures that the Board of Directors' diversity of perspectives and experiences enables its Directors to address the complex and multifaceted challenges posed by emerging or cross-cutting risks effectively, such as those mentioned above.

All in all, the members of Bankinter's Board of Directors have experience in identifying, assessing and managing risks in their areas of responsibility, proof of which can be seen in their annual performance appraisal reports. Likewise, they have the skills and expertise needed to understand how all types of risks can impact the Bank's operations, its customers and the market on a global scale. Therefore, Directors are also in a position to understand and monitor emerging risks.

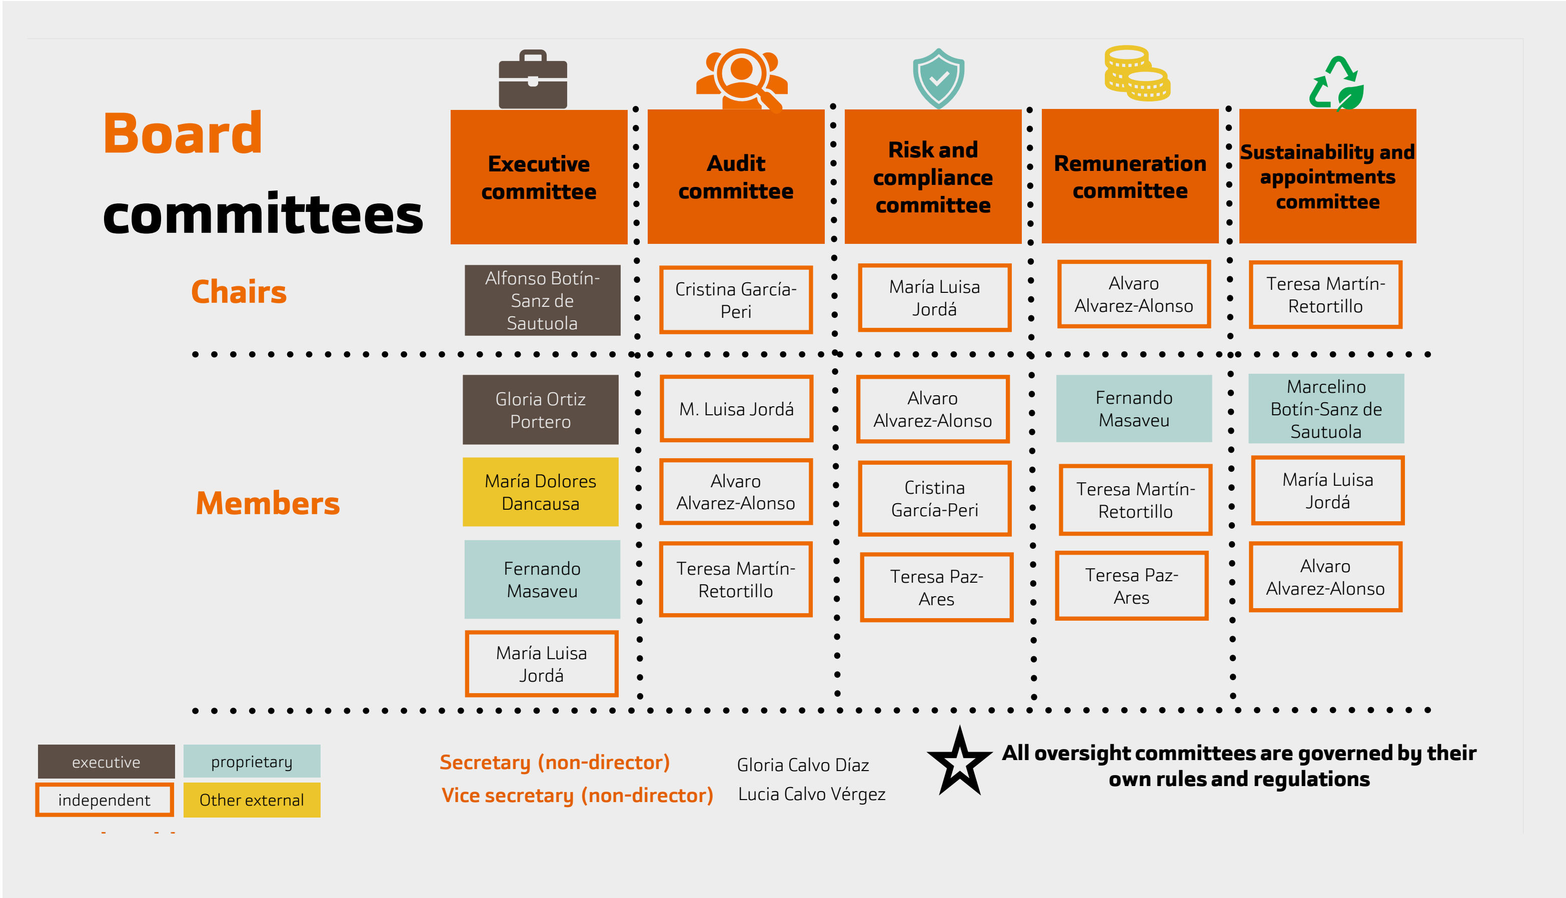
In addition, on-going training and specialised external advice, when deemed necessary, are elements that ensure this understanding and supervisory capacity through the updating of the Board Members' knowledge and experiences regarding the latest trends, regulations and supervisory expectations, and best practices in risk management. This guarantees that the Board ensures these risks are integrated into the business strategy at all times, which includes incorporating them into decision-making processes, remuneration and long-term planning.

For more details on the expertise of the Members of Bankinter's Board of Directors, please refer to the Annual Corporate Governance Report, which is available on the Bankinter corporate website.

Board Committees

In 2024, changes have occurred in the composition of Bankinter's Board Committees as a result of changes within the Board. The composition as of 31 December 2024 is as follows:

In addition, in January 2025 and at the proposal of the Sustainability and Appointments Committee, the Board of Directors approved the incorporation of María Teresa Pulido Mendoza as the Director of the Executive Committee and of the Sustainability and Appointments Committee. Thanks to her extensive experience as Director of Strategy in a multinational transport and mobility infrastructure company, with important implications in terms of sustainability in general and, specifically, in environmental matters, as well thanks to her in-depth understanding of how Bankinter and its Group works, this will boost the expertise of both Committees in their respective areas of responsibility.



General Shareholders Meeting

Since 2021, Bankinter has had the necessary statutory authorisation to hold meetings exclusively by electronic means, with all the necessary provisions to ensure that shareholders can attend and effectively exercise all their rights. Having this possibility gives the Bank greater flexibility, which can be very useful in situations where this format is advisable without relying on exceptional legislative measures.

Bankinter has a communication policy with shareholders, institutional investors and proxy advisors aimed at taking their legitimate interests into account. Therefore, they receive information on the bank's priorities and criteria in relation to all matters related to corporate governance, among other aspects of management. Dialogue with stakeholders continues to be one of Bankinter's priorities, through which it verifies that its strategy and objectives are in line with their expectations, and ensures the continuity of those who drive its profitability and sustainable growth. Bankinter provides information on the bank's priorities and criteria in relation to all matters related to corporate governance, among other aspects of management.

Coherent structure

One of the pillars of Bankinter's robust Corporate Governance system is its internal rules and regulations, comprising the frameworks, policies and procedures governing the different areas of its corporate life and activity, in accordance with the applicable external regulations and best practices. The consolidation of these into a coherent regulatory pyramid, included in the Group's Corporate Governance Policy, which has been reviewed and updated in 2024. This ensures that the internal rules and regulations maintain, at all times, an efficient structure, with clear and well-defined areas of application and powers of proposal, approval and monitoring, with the aim of facilitating the supervisory function of the Board and other governing bodies.

As regards the Bankinter Group's structure, relations with subsidiaries are based on a solid mechanism for coordinating their internal governance systems. In accordance with the Corporate Governance Policy, the Board of Directors establishes the appropriate guidelines to ensure the exchange of information necessary for the strategic coordination of the activities carried out by the different companies in the Group. Furthermore, by adapting the internal rules and regulations of its subsidiaries to the general policies approved for the Group, Bankinter guarantees consistency in the application of its principles in corporate governance, while respecting the particularities arising from their respective areas of activity, their specific regulations and the principle of proportionality.

Furthermore, the Board Committees continued to exercise their supervisory function in relation to the Bankinter Group companies, both through the exercise of specific powers and through coordination in matters within their competence, thus contributing to maintaining transparency and simplicity in the organisation.

In this sense, the committees exercise the functions that are within their competence for those companies in the Group that, not having their own committees due to their size and composition, nevertheless require the work of supervision in the matters for which the corresponding committee is responsible. This is the case, specifically, of the functions exercised by the Remuneration Committee and the Sustainability and Appointments Committee of the parent company with respect to Bankinter Luxembourg, Bankinter Asset Management, the companies that make up the Consumer Group, with Bankinter Consumer Finance as the parent company and the Bankinter Investment Group.

Notwithstanding the foregoing, during the year 2025 there will be significant changes in the internal structure of the Bankinter Group with the aim of simplifying it and making it more efficient to address the challenges and opportunities identified in the strategic plan for the different business lines and geographies in which it operates. This will result in the merger of EVO Banco with Bankinter and the transformation of the Irish branch AvantCard, DAC, into a Bankinter branch in Ireland. Both operations will generate synergies within Bankinter's scope and from a corporate governance perspective, the governance structures within the Group will be simplified, which will lead to more direct supervision and control by the parent company and a strengthening of the Bankinter Group's corporate governance system.

Board Evaluation

The Board of Directors conducted its annual internal assessment of its performance for the year 2024. It took into account the changes in the Non-Executive Chairmanship of the Board and the change of CEO, assessing their performance since their appointment, as well as the succession process carried out during the year. Particular attention has also been paid to matters related to the supervision of risks, including emerging risks such as climate change, technological or geopolitical risks. The evaluation of the functioning and performance has been carried out on the following collegiate bodies and functions: Board of Directors, Committees, Non-Executive Chair of the Board and Executive Directors, as well as the Committee Chairs.

The results of this internal evaluation show the satisfaction of the members of the Board with its functioning and with the execution of the succession process undertaken by the bank, as well as a very high degree of cohesion between them and a common vision of the role of the Board, without any deficiency having been detected that required an action plan. As every year, this result will be reported in the Annual Corporate Governance Report to be presented at the General Shareholders Meeting to be held in 2025.

The challenges for 2025

Bankinter and the financial sector in general are facing an increasingly complex and dynamic environment. New challenges are anticipated in 2025, which will require constant supervision and a significant capacity to adapt; from managing interest rate volatility to digital transformation and cybersecurity, without forgetting the importance of regulatory compliance, in a scenario of increasing regulatory intervention, sustainability objectives and geopolitical risks.

Digital transformation will continue to be a priority for Bankinter. However, the adoption of new technologies and operational digitalisation processes entail significant risks. The rise of cyber threats, exacerbated by geopolitical tensions, will remain a key concern, requiring the Board to remain abreast of the latest trends in digitalisation, technology and cybersecurity.

Furthermore, the opportunities associated with innovation are a key factor in the Bankinter Group's strategy and are also a challenge due to the rapid development of technology and specifically, in the activity of financial institutions.

In 2025, sustainability will remain a key objective. Bankinter will move forward in achieving its strategic plan in this area by strengthening its governance and progressing in the definition and measurement of metrics and indicators, among others, of environmental risk, especially those linked to credit risk. Integrating these criteria into their assessments and decisions will be essential to meet regulatory and investor expectations.

All of this requires a robust, coherent and efficient corporate governance system, framed by constant dialogue with stakeholders, which will continue to be one of the bank's priorities as a tool to ensure that its strategy is aligned with their expectations, ensuring, in accordance with Bankinter's corporate culture and values, the necessary transparency and disclosure of information to generate the necessary trust and drive the profitability and sustainable growth of its investments in the bank.

Sustainability

Sustainability

More resources and a new organisation to respond to new challenges

Over the past decade, Bankinter has demonstrated a strong commitment to sustainability by integrating Environmental, Social and Governance (ESG) criteria into its corporate strategy. The lines of action of this strategy are structured around sustainability plans, such as the Tic-Tac-Toe Plan (2012-2015 / 2016-2020), the 3D Plan (2021-2023) and the 2024-2026 DNA Plan, which is still in force. These programmes seek to promote sustainable and inclusive development, aligning with corporate values of agility, enthusiasm, integrity and originality. Thanks to these initiatives, Bankinter not only contributes to protecting the environment, but also fosters a positive impact on the society and economy of the countries where it operates. Bankinter's strategy has been recognised in the main ESG indices and *rankings*.

The bank has been publishing sustainability reports on a regular basis for more than a decade (the so-called non-financial information statements since the entry into force of Law 11/2018 on non-financial information and diversity). In this way, Bankinter guarantees transparency and monitoring of its progress in this area.

In 2024, Bankinter strengthened its Sustainability area, allocating the necessary resources and changing the reporting structure so it would report directly to the Chair's Office. Furthermore, it is under the supervision of the Sustainability and Appointments Committee of the Board of Directors. This Committee is responsible for reviewing the strategic sustainability plan, monitoring the strategy and performance of the Group's ESG indicators, overseeing dialogue with stakeholders, assessing ESG risks and ensuring the public dissemination of non-financial and diversity information.

With this new organisation, Bankinter seeks to respond to the growing challenges in terms of sustainability. Specifically, the new function is aimed at covering the following objectives:

- Promote the identification, evaluation and capture of value creation opportunities arising from the sustainable transition in both the environmental and social dimensions.
- Lead Bankinter to the highest level in the sustainability standards defined by the European Union.
- Ensure complete and rapid adaptation to current and future regulatory and supervisory requirements.
- Transmit Bankinter's contribution to ESG concerns to its numerous internal and external stakeholders.

A plan with three pillars

In 2023, Bankinter conducted a dual materiality analysis that identified the sustainability priorities relevant to the Bank and its stakeholders. Following this analysis, the Sustainability Policy was updated. These priorities were integrated into the Bank's general principles. Likewise, the Bankinter Group's governance criteria were outlined and the 2024-26 DNA Sustainability Plan was defined.

For the structuring of the plan, the following references, among others, were considered:

- The Spanish Companies Act and Law 11/2018, of 28 December, on non-financial information and diversity.
- Directive (EU) 2022/2464 of the European Parliament and of the Council as regards corporate sustainability reporting (the Corporate Sustainability Reporting Directive or CSRD).
- Delegated Regulation (EU) 2023/2772, supplementing Directive 2013/34/EU of the European Parliament and of the Council as regards sustainability reporting standards.
- The recommendations in the Good Governance Code of Listed Companies approved by the CNMV.
- The commitments that Bankinter has signed within the framework of various international initiatives, including, among others, the Guiding Principles of the United Nations Global Compact, the Equator Principles, the Principles for Responsible Banking and the initiative for the Financial Sector of the United Nations Environment Programme and *Net-Zero Banking Alliance*.
- Analysis of the results of assessments by leading ESG analysts and rating agencies.
- International standards and frameworks related to Sustainability management (GRI, IIRC, ISO 26000, SGE 21, etc.).
- Analysis of the results of satisfaction surveys completed by stakeholder Groups such as customers and employees.
- The challenges of the UN Sustainable Development Goals (SDGs).
- Consideration of the best practices of global sector leaders.

The 2024-26 DNA Sustainability Plan has three pillars, based on the above references:

A

The letter A refers to "Responsible Action". It focuses on the bank's ethical management and its commitment to responsible and transparent business practices. Its strategic lines are corporate governance, ethics and transparency, human rights and supply chain.

D

The letter D represents the The letter D represents the "Differenciation·. This includes aspects related to Bankinter's businesses from a perspective of sustainability and also addresses ESG risks. The strategic lines related to this pillar are sustainable finance, climate change, natural capital and cybersecurity.

N

And the letter N refers to "Sustainable Business" ("Negocio sostenible" in Spanish). This focuses on the bank's ethical management and its commitment to responsible and transparent business practices. The strategic lines in this area are corporate governance, ethics and transparency, human rights and the supply chain.

Action

The strategic pillar 'A', corresponds to 'Responsible Action'

Material issues:

- Corporate Governance
- Ethics and Transparency
- Human Rights
- Supply Chain

Differentiation

The strategic pillar 'D', which corresponds to 'Differentiation'

Material issues :

- Customer Relationship
- People Management
- Sustainable Innovation
- Relationship with the Community

Negocio (Business)

The strategic pillar 'N', corresponding to "Negocio Sostenible' (Sustainable Business)

Material issues:

- Sustainable Finance/Opportunities
- Climate Change
- Natural Capital
- Cybersecurity

ESG Risk2

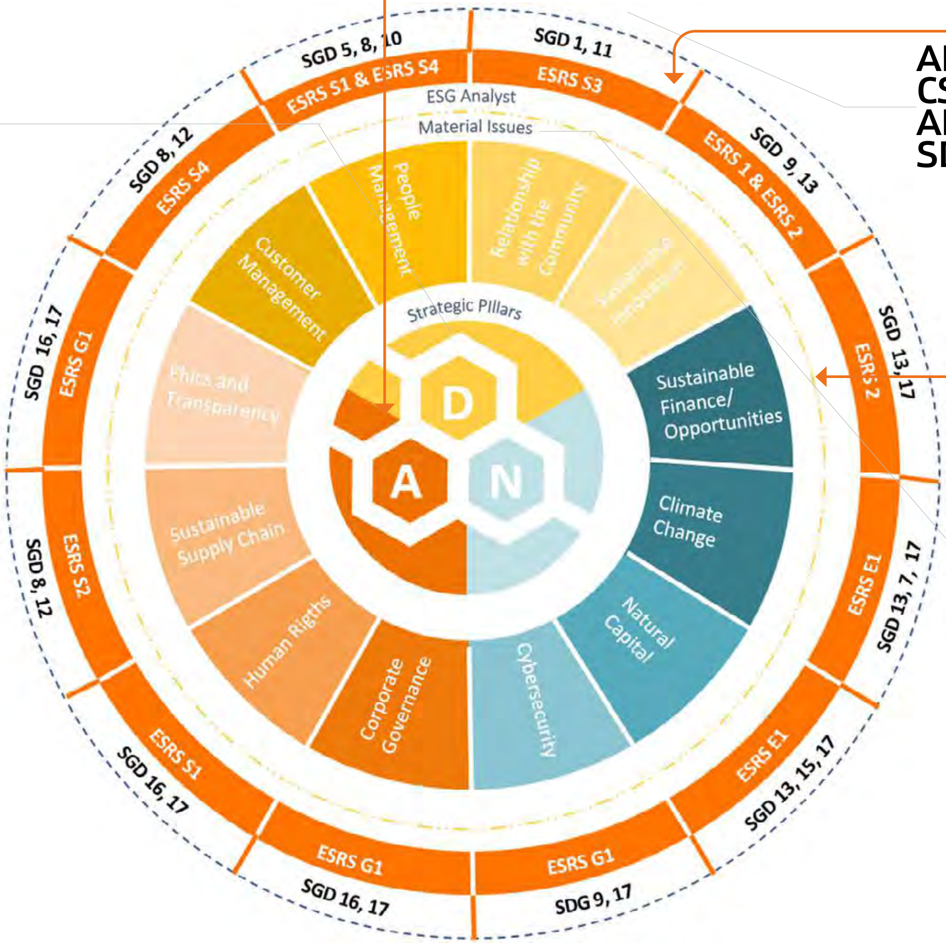
Structure of the Plan

ESG PILLARS[1]

These pillars give rise to the strategic lines

ALIGNMENT WITH CSRD[2] (ESRS)[3], ESG ANALYSTS[1] and SDGs[4]

MATERIAL ISSUES



The DNA Plan includes monitoring of initiatives that, given their relevance, are developed in other sections of this report, such as those referring to People, Digital Security and Quality.

1. ESG: Environmental, Social and Governance
2. CSRD: Corporate Sustainability Reporting Directive
3. ESRS: European Sustainability Reporting Standards
4 SDGs: Sustainable Development Goals

Following the publication of the CSRD, the development of the NEIS (European Sustainability Reporting Standards) and the associated EFRAG (European Financial Reporting Advisory Group) guidelines, Bankinter has updated its materiality analysis. The process of this exercise is detailed in the Non-Financial Information and Sustainability Information Statement and has resulted in the identification of 43 material impacts, risks and opportunities in the areas of governance, climate change, own workers and consumers and end users. According to the new standards, Bankinter aligned the DNA Plan in 2024 with a focus on the initiatives, while homogenising the metrics and structuring all of its control processes.

Make progress in all dimensions

The most relevant milestones achieved during the 2024 financial year are described below.

In the area of Responsible Action, mentioned above, Bankinter reorganised the Group's sustainability governance actions and conducted a new double materiality analysis based on the current sustainability reporting requirements. In addition, Bankinter modified some of the relevant policies within the Group (such as safety, health and well-being), as well as the sector ESG policies within the Risk Framework Agreement.

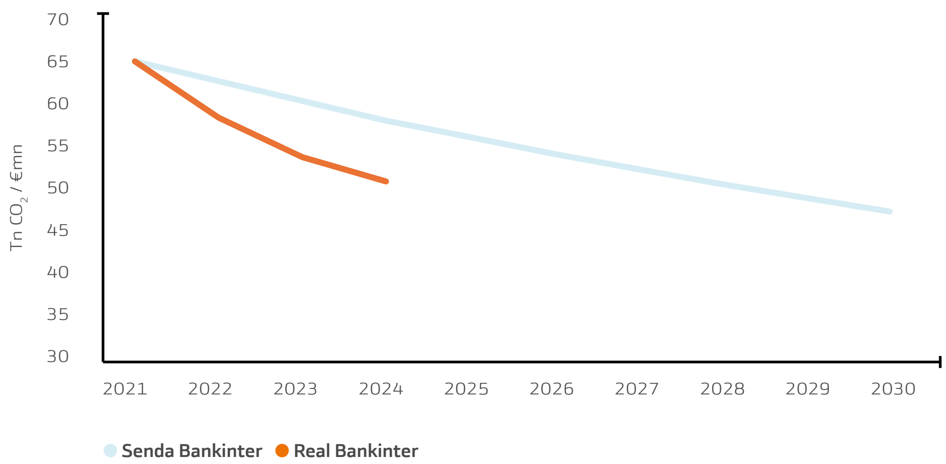
With regard to Differentiation, Bankinter S.A. and Bankinter Global Services certified their Safety, Health and Wellbeing management system according to the international standard ISO 45001. In addition, the bank continued to promote financial education through different programmes, such as the digital platform "Money Town", the "Your Finances, Your Future" project, together with the AEB, the "Game of Traders" game for students or workshops adapted for seniors and for people with intellectual disabilities.

With regard to third sector support actions, 20% of the bank's workforce in Spain participated in its corporate volunteering programme. Likewise, the bank organised the 13th "Involvement and Solidarity" initiative, which focuses on helping the non-profit organisations proposed by employees and is financed with the funds raised with the Bankinter Solidarios credit card marketed by the bank. Throughout its history, the "Involvement and Solidarity" initiative has helped over 135 social projects, allocating over 667,000 euros.

In the area of Sustainable Business, Bankinter has designed a sustainable finance framework and set up the Sustainable Marking Unit, which aims to assess transactions using sustainability criteria and mitigate the risk of *greenwashing*. The sustainability axis was also incorporated into the business strategy, in order to systematically identify business initiatives, formalise commercial alliances and develop training plans for the commercial network and its support areas.

In line with commercial developments, Bankinter has also made progress on climate and environmental risk management to meet the requirements of the European Central Bank. In this area, it is worth highlighting that the bank has managed to adhere to the decarbonisation roadmap of the Corporate & SME Banking portfolio, offsetting 5.2% of all emissions per million euros invested when compared to the 2023 figures.

Decarbonisation Pathway: Corporate & SME Banking Spain and Portugal



Objectives

Looking ahead to 2025, Bankinter has set the following objectives:

- Complete the implementation of the DNA Plan in all geographies in which the bank operates, also incorporating Avant Money.

- Analyse in more detail the degree of alignment of the business strategy with sector-specific decarbonisation strategies, expand the range of products and solutions for the decarbonisation of customer activities and strengthen the measures to control the risk of *greenwashing*.

- Strengthen the standardisation of suppliers with ESG criteria and strengthen the due diligence process in terms of human rights, in accordance with the future requirements of the CSDDD (Corporate Sustainability Due Diligence Directive).

- Incorporate accessibility criteria in all its channels of relationship with stakeholders (physical and digital) within the framework of its "A bank for all" programme, taking into account the requirements of the regulations that come into force in July.

A recognised strategy

The work carried out in the field of sustainability, in its three dimensions, was recognised by various national and international organisations:

- *Dow Jones Sustainability Index World* and Europe, for the seventh year in a row.

- Top Employer.

- Top 3 best companies to work for, according to *Actualidad Económica*.

- Top 30 in the MERCO ESG *ranking*.

- One of the most sustainable companies in the world, according to Time *Time* magazine.

- Best Bank in Spain in terms of its CSR performance, according to *Euromoney*.

People Management

People

Five major lines of action to attract the best talent

The Strategic People Plan evolved in 2024 with the aim of securing the best talent so that the bank's business is sustainable over time, grows robustly and enables it to provide maximum value to customers. To this end, work was carried out throughout the year on various initiatives Grouped around five major lines of action.

1. Attract the best. During 2024, many jobs and opportunities were created for a very diverse Group of junior and experienced talent in terms of age, gender and culture. Our new talent recruitment plans focused on recruiting recent graduates and junior professionals at the beginning of their careers. Most new hires joined the Branch Network and Telephone Banking areas. In addition, the 'STEAM Talent' programmes, aimed at recent graduates in science and technology disciplines, helped to strengthen the bank's analytical and technical areas.

2. Developing internal talent. One of the bank's priorities is to understand the needs of internal talent and create opportunities for their professional growth. Hence the importance of training professionals, to endow them with the knowledge and skills necessary for their current roles and also for those they may take on in the future, preparing them to incorporate new technologies into their day-to-day activities.

3. Generate an environment of inspiration and commitment. Suitable development programmes that cater to the needs of each career milestone, so as to train professionals who can become benchmarks in their areas of expertise, who lead by example with an open-minded and visionary approach. In addition, the People area works to promote a healthy lifestyle. Likewise, we seek to build an innovation ecosystem with programmes to train on cutting-edge techniques and methodologies and to develop the necessary skills, with a view to maintaining the innovative DNA that has always characterised the bank and to generate a cross-cutting collaboration model.

4. Ensure competitive remuneration. We wish to make sure that the remuneration and benefits package is competitive and also known and valued by all.

5. Make progress on the sustainability strategy. Our aim is to develop financial products consistent with our sustainable business strategy, train our people so they have the suitable knowledge needed to sell and provide advice in relation to these products, and foster a general culture of sustainability and diversity so all behaviour is aligned with the bank's strategy.

"

The Strategic People Plan evolved in 2024 with the aim of securing the best talent so that the bank's business is sustainable over time, grows robustly and enables it to provide maximum value to customers.

Securing the best talent

What **talent** do we need?

Strategic businesses
Key groups
Critical capabilities

How do we **ensure** this?

Employer brand
Attract and engage talent to join us

Development and career
Help talent grow and retain its footprint

Environment and leadership
Inspire and engage talent

Culture of sustainability

Remuneration and benefits

Safety, health and well-being

Bankinter's people are its main asset. Therefore, one of its fundamental objectives is to ensure the safety, health and well-being of its staff. Committed to this purpose, in May 2024 the bank updated its policy on this matter, which applies to all its operations and activities, phases of the value chain, geographical areas where it operates and to stakeholders, including staff, contractors and collaborators.

To improve the effectiveness of preventive management and compliance with the most relevant national and international regulations, since June 2024 Bankinter and Bankinter Global Services have had a safety, health and well-being management system certified under the International Standard ISO 45001:2018 in accordance with the criteria established by the National Accreditation Entity. Likewise, both entities are certified as "healthy companies" by the World Health Organisation, thanks to their "Bankinter, Here to Help" programme, which was also recognised as a model of good business practice by the National Institute of Occupational Safety and Health in 2023.

Furthermore, indicators have been designed to assess the development, suitability and effectiveness of the management system implemented. These results are subject to several reviews by senior management and are ultimately analysed by the Sustainability Committee.

Relationship and closeness with people

New outreach programmes were rolled out in 2024 to help people throughout their career at Bankinter and enrich their experience at the bank. The Human Resources *business partners* held more than 1,150 personal conversations with employees to identify their professional growth concerns and provide guidance on the different paths to help them take the lead in their own professional development within the bank.

In addition, to broaden the scope of the programme, six information sessions were held on the new employee portal, which were attended by more than 205 people. In addition, sessions open to the entire staff on various topics related to Human Resources were also held, with more than 2,050 participants. Along these lines, it is worth highlighting the decision to contact all employees in the areas affected by the flash floods (DANA) on 29 October, so as to check their situation and provide them with the necessary material and emotional support. 153 people were contacted during the initiative.

Moreover, the communication campaign #PorSerBankinter was maintained in 2024 on the social benefits available for many aspects of employees' lives, adapting the calendar of publications to needs that arise during the year. During the year, 15 publications were posted.

Training

Each year, the Training and Talent area seeks to support Bankinter's growth strategy with an annual training plan that is tailored to the bank's needs to identify talent, plan succession and train staff with the knowledge necessary for their current and future roles.

The Training and Talent Plan is developed by the Corporate University and its four learning schools (Corporate Culture, Commercial, Digital, and Technical Excellence, Talent and Leadership). In 2024, the following action plans and strategic lines were followed:

- **Technical qualification.** The objective is to keep the staff constantly updated in order to be able to respond to market demands.

- **Delimitation and access to the network.** The bank's various businesses and activities take centre stage, with content adapted to the day-to-day activities of the network and with the direct participation of the bank's experts.

- **Bankinter strategic trends.** The learning strategy is adapted to the market trends, which are also essential for Bankinter: Cybersecurity, sustainability, data, generative artificial intelligence, innovation...

- **Critical skills.** The focus is on identifying critical skills and the responsibility of each professional in their own growth.

- **Channel diversity.** The entire training programmes available at the Corporate University combines in-person and digitalisation with in-person, virtual and *online* options.

273,304 hours of training were delivered during 2024, of which 27% were in-person. 100% of our employees received training over the year, with an average of 51.1% per employee. The student satisfaction index (NPS) of the more than 18,000 surveys carried out on the 690 training courses taught was 65%, on an annual moving average.

The Corporate University schools assumed different training responsibilities. In 2024, the Corporate Culture School welcomed 215 new hires through its general onboarding programme and the new junior talent through the FUTURO Programme, in which 148 people participated, in addition to preparing the onboarding processes for future colleagues of EVO Banco in 2025.

The Commercial Excellence School focused on transforming the growth strategy of the bank's different businesses with a two-fold objective: address the business plan to meet the growth, profitability and efficiency challenges set by the Board of Directors and meet the mandatory training requirements established by the different regulatory bodies (CNMV, Banco de España and Department of General Insurance).

The Digital and Technical School rolls out technical training programmes for the specialist areas of Head Office Services and business, with a focus on five trends considered as strategic (data, generative artificial intelligence, sustainable finance, cybersecurity, fraud and innovation) and on language learning.

For its part, the Talent and Leadership School identifies internal talent through different exercises (in 2024, 224 people from the Risk and Digital Banking areas participated in these programmes), evaluates performance (99.6% of the workforce received the BKcrece process) and plans a smooth and controlled succession of critical positions. The school also focuses on skills training and leadership development for 406 people who manage teams.

Selection

In 2024, Bankinter continued to create jobs and generate a multitude of opportunities for both junior and experienced talent. Throughout 2024, 153 juniors began their professional careers at the Bankinter Group, representing 43% of the total number of new hires this year. Likewise, during the year, university internship programmes aimed at both financial profiles and science and technology continued, with a great reception by students: More than 5,000 applications were submitted in the different calls. To this end, 291 students completed internships in different areas of the bank, including the international destinations of Bankinter Luxembourg, Bankinter Portugal and Avant Money in Ireland, which welcomed 10 recent graduates through ICEX VIVES scholarships funded by *Next Generation* Europe funds.

As regards expert talent, the bank's recruitment focused primarily on commercial profiles for the most specialised businesses and specifically on those professionals with the necessary knowledge to continue promoting technology and digitalisation projects.

With regard to the in-house talent, the bank provided a wide and varied range of opportunities across all of its areas, both in Spain and abroad. In 2024, 153 vacancies were published, 59% more than the previous year.

In line with the aim of providing growth and opportunities for internal talent, the third round of "Bankinter Mobility Exchange Edition" was held last year, a training and experiential programme aimed at facilitating the spread of knowledge and cultural integration, reinforcing our corporate identity through the professional contacts of employees from different areas and geographies. On this occasion, 17 of the best talents with potential went on an exchange to share a week with the teams of Bankinter Spain, Bankinter Luxembourg, Bankinter Portugal, Avant Money and EVO Banco.

Corporate benefits

Bankinter offers a range social benefits beyond the legal requirements for all employees to improve the quality of their personal life and professional development, including training assistance for employees and their children, insurance (health, life and accident), monthly salary advances, special terms and conditions for banking products and services, and meal subsidies depending on their hours and type of working day.

Employees also have a flexible remuneration system, under which they can replace part of their fixed monetary remuneration with certain goods and services (remuneration in kind), such as childcare vouchers, shares, training, pension plan contributions, transport cards or restaurant cards.

This increases employee remuneration in two ways: through the bank's bargaining power to get the best prices possible for the goods and services included in the system; and through the tax advantages offered by certain products arranged through this system. Currently, 75% of employees use this flexible remuneration tool.

Pension schemes

In long-term benefits, intended to cover certain contingencies, the bank offers the following benefits:

- Supplementary cover additional to the benefits paid by the Social Security system in the case of widowhood, orphanhood, permanent occupational disability, absolute permanent disability or severe disability. They benefit the entire workforce.

- Coverage off pension commitments for employees in service since before 1 March 1980, as established in the sector collective bargaining agreement.

- Annual contribution of 550 euros, pursuant to the provisions of the banking sector collective agreement, to the pension plan of employees who have more than two years' service in banking and whose pension commitments are not covered by any other scheme.

Bankinter is also a member of the Employee Family Plan, promoted by the Adecco Foundation. This provides a variety of types of assistance to employees with disabilities and family members in a similar situation so they can achieve labour market and social integration or take part in other activities, including leisure activities.

Total compensation

Since 2018, Bankinter has had a total remuneration platform that allows employees to consult all the updated elements that form part of their pay package: fixed and variable remuneration, benefits and emotional remuneration. All of them are aimed at meeting your personal, family and professional needs, with the aim of improving your quality of life and promoting work-life balance.

Annex

Information for shareholders and investors

The Bankinter S.A. Annual Report is presented at the Annual General Meeting and is available to all shareholders of the Company. The information contained covers the period from January 1, 2024 to 31 December, 2024, unless otherwise specified. The previous Report, covering the year 2023, was published on 21 February 2024.

This document, coordinated by the Bank's Institutional Communication area, was prepared with information collected from the different areas of the bank through interviews, questionnaires addressed to those responsible and requests for accurate information.

The Bankinter Annual Report has followed a process of pooling, review, correction and audit.

In addition to the Annual Report, the bank publishes its consolidated quarterly results report in January, April, July and October. Both reports are available on Bankinter's corporate website.
